**Technical Graduate Engineer**
**Location –** Sowerby Bridge
**Salary: DOE**

A graduate engineer is required to engage with a broad range of technical department activities such as:

- Sales Technical Support
- Manufacturing trouble-shooting
- Product development and research activities
- Engaging with technical standards
- Project delivery
- Report writing

The role will closely support the technical manager and has the potential for significant personal development for an individual who is ambitious and motivated to succeed.

**Person specification / Requirements**

The role is technical and tends towards a mechanical engineering graduate with good practical skills, however, other degree disciplines with a technical bias (e.g. Manufacturing, Physics) are encouraged to apply. The person must be ambitious with a strong motivation to develop their capabilities in new areas and to deliver on tasks and projects. This requires problem solving skills and a commitment to the team and the organisation, along with a keen sense of taking responsibility and ethical professional conduct. Full training will be provided and a commitment to personal development planning is expected.

Working Hours 40 hours per week, Monday to Friday 8.00 a.m until 5.00 p.m.
