- Bioflex Ultra Part Number System

## HOSE
- Bioflex Ultra Hose Liners  
- Bioflex Ultra Hose Braids  
- Bioflex Ultra Rubber Covers  
- Bioflex Ultra External Protection Systems

## FLANGE FITTINGS
- Flange Fittings, Non-Lined  
- Flange Fittings, PTFE Lined

## CAM AND GROOVE FITTINGS (CAMLOCKS)
- Female Cam & Groove Fittings, PTFE Lined and Non Lined  
- Male Cam & Groove Fittings, PTFE Lined and Non Lined and Cam Male-to-Flange Adaptors, PTFE Lined

## SANITARY TRICLAMP (TRICLOVER) FITTINGS
- Sanitary Triclamp (Triclover) Fittings, PTFE Lined Flared and Hot Formed  
- Sanitary Triclamp (Triclover) Fittings, Non Lined  
- 90˚ Elbow Sanitary Triclamp (Triclover) Fittings, Non Lined

## SANITARY FITTINGS (EUROPEAN)
- DIN 11851 Male & Female Fittings, Non-Lined  
- DIN 11851 Male & Female Fittings, PTFE Lined  
- SMS and RJT Female Fittings, PTFE Lined, and RJT Female Fittings, Non-Lined

## BSP, NPT & JIC THREADED FITTINGS (Not Lined)
- NPT & BSPT Fixed Male and NPT Fixed Female Fittings  
- BSP 60˚ Cone Seat Female Fittings and Lug-Type Female Fittings  
- 37˚ JIC Female Fittings & Adaptors

## PTFE Dip Pipes
- PTFE Dip Pipes, Straight or 90˚ Elbow

## 90˚ELBOW FITTINGS
- 90˚ Elbow Fittings, PTFE Lined and Non-Lined

## 3-A SANITARY FITTINGS

## HEAT JACKETED HOSE ASSEMBLIES
- Insulated Hose Assemblies  
- Steam Heated Hose Assemblies (CH Grade)  
- Electrically Trace Heated Hose Assemblies (ETH Grade)

## BIOFLEX ULTRA STANDARD LABELLING, STREAMLINE TAGGING & COLOUR CODING

## CORRECT HOSE CONFIGURATION & LENGTH CALCULATIONS
- for Bend Radius  
- for Abrasion & Torque  
- for Length Calculation

## CONDITIONS OF SALE
- Pages 42 & 43
PTFE, or Polytetrafluoroethylene, comprises of long-chain molecules of carbon atoms, each linked to two fluorine atoms.

The fluorine atoms provide a helical spiral which surrounds the carbon chain and protects it.

It is this structure which creates the unique properties for which PTFE is well-known.

- **Excellent Chemical Resistance**
  
  PTFE is renowned as the most chemically resistant material known. Only a very few, very unusual substances and conditions can affect it, like Fluorine gas at high temperature and pressure and liquid, boiling sodium metal.
  
  PTFE lined hoses can therefore be used for a wider variety of chemicals than any other hose type, making it the ideal choice for very corrosive chemical applications and multi-product applications.

- **Non-Stick Surface**
  
  The use of PTFE as a surface for cookware products has demonstrated to the world how easily cleanable PTFE surfaces are.
  
  This means that PTFE lined hoses can be purged 100% clean more quickly, easily and reliably than any other type of hose.

- **Excellent Temperature Range**
  
  The cookware application also demonstrates another of PTFE’s many attributes - temperature resistance. PTFE itself can be used as a hose liner at temperatures from -150°C up to +260°C, dependent upon the hose design and the application conditions.
  
  This is the widest temperature range of any rubber or plastic hose lining material.

- **Very High Electrical Resistance**
  
  Most aerospace electrical wiring has a PTFE cover, due to the excellent electrical resistance of PTFE. This property is however, a disadvantage in some hose applications where there is a risk of developing an electrostatic charge inside the hose bore. Aflex Hose have developed a non-contaminant, FDA and USP Class VI compliant solution to this problem.

- **Hose Design**
  
  The only issue with PTFE as a hose lining material is the best way it can be integrated in to the hose design. This is where Aflex Hose have a proven record of success over the last 40 years.
The World’s Leading Manufacturer of PTFE Flexible Hose

Aflex Hose, founded in 1973, pioneered the concept of PTFE lined flexible hose for the transfer of process fluids.

Over the years since then, hundreds of thousands of custom-built PTFE Lined hoses have been designed and manufactured by Aflex Hose to cope with the most difficult of operating conditions, and Aflex have continuously developed and expanded their product range having pioneered and introduced Antistatic hose, Polypropylene Braided hose and many other innovations in response to customer demands.

In 2001, Aflex fulfilled the most stringent demand yet. Customers, worldwide, had always asked for the ultimate PTFE lined flexible hose... one product which incorporates the advantages of both convoluted and smoothbore designs. A product which is sufficiently flexible, like convoluted, yet which retains the advantages offered by smoothbore, like fast flow rate and cleanability.

After years of painstaking research and development, Aflex launched such a hose .... BIOFLEX.

Bioflex is a smooth bore, highly flexible, PTFE lined hose. Its design overcomes the disadvantages of conventional smooth bore and convoluted PTFE flexible hose designs, dramatically improving on many of their individual technical performance parameters.

The key feature of Bioflex PTFE hose is the PTFE liner design, which comprises integral rib sections which support the tube against kinking, vacuum and pressure, and highly compressed web sections which give a smoothbore inner surface and excellent flexibility.

In 2013 in response to customer’s requests for an even more flexible and kink resistant hose, Aflex re-designed the convolution profile of the Bioflex PTFE liner tube and introduced a high tensile, 316 stainless steel wire, helically wound in to the root of the convolutions. This wire provides greatly increased kink resistance by providing radial reinforcement to the tube, and axial reinforcement to the web section, preventing web section collapse when the tube is heavily flexed.

The actual bore size of the tube and hoses was also slightly increased to permit easier insertion of fittings. Hoses incorporating this PTFE liner tube design have been re-named as .......... BIOFLEX ULTRA.

Note - The new designs with the increased bores and the helical wire reinforcement only apply to the standard products. The ¼” size will remain the same as before, with nominal bore size and no helical wire reinforcement.
Bioflex Ultra Hose Design Options

Bioflex Ultra Hose Grades are made up by combining the Design Options, which are defined by 2 letters as shown below, and fully described on the indicated pages.

For example, “Bioflex Ultra AS, PB, SG” defines a hose with an Antistatic PTFE liner (AS) and a Polypropylene braid (PB) and an outer “Safegard” (SG) spiral HDPE protection sleeve.

<table>
<thead>
<tr>
<th>PTFE Liner Tube Options -</th>

</thead>
<tbody>
<tr>
<td>Braid Options -</td>
<td>TO (Tube Only, No Braid), SS (316 SS Wire), and PB (Polypropylene) - Page 16</td>
</tr>
<tr>
<td>Rubber Cover Options -</td>
<td>RC (Blue EPDM), BK (Black EPDM) and SI (Silicone Rubber) - Page 17</td>
</tr>
<tr>
<td>External Protection Options -</td>
<td>SR (Scuff Rings), SG (Safegard Spiral) and PC (SS Wire Coil) - Page 18</td>
</tr>
</tbody>
</table>

Note: Rubber covered hose is marked in accordance with EN 16643

Bioflex Ultra in Comparison with Convoluted PTFE Hose

- **Hygienic Cleanability** - much better, due to no internal convolutions
- **Flow Rates** - more than 2 x higher
- **Pressure Ratings** - more than 1.5 x higher
- **Self Draining** - Excellent self draining with PTFE lined fittings
- **Non-Whistling** - no whistling noise with gasses

Bioflex Ultra in Comparison with Conventional Smoothbore FEP, PFA or PTFE Lined Rubber Hose

- **No Adhesives** - No toxic adhesives used in the Bioflex Ultra construction, eliminating the possibilities of Process Fluid contamination in service
- **Flexibility** - Much better flexibility
- **Internal Shape Control** - No distortions in bore when flexed

Bioflex Ultra in Comparison with Silicone Rubber Hose

- **Hygienic Cleanability** - much better, due to the non-stick PTFE Liner
- **Chemical Resistance** - considerably improved, particularly to strong oxidising acids and bases
- **Temperature & Pressure Ratings** - much higher temperature and pressure capability
- **Steam Resistance** - permanently resistant to steam sterilising (unlike silicone hose, which has a limited life)
Bioflex Ultra has been designed to fulfil the most demanding of customer expectations and, as such, has been subjected to a rigorous Accelerated Service Life Testing Programme in comparison with competitive hose products.

The ‘Rolling U’ Test.

Bioflex Ultra samples were run side by side with competitors’ products, including smoothbore FEP, PTFE or PFA lined Rubber hose products, and also smooth flex products, on a ‘Rolling U’ test rig.

The 1” bore samples were “Rolled” at the minimum bend radius and at the maximum working pressure quoted for the competitor’s product.

Results were as follows:

- **Rubber Covered Bioflex Ultra Hose**
  - 300,000 cycles, no failure.
  - No leakage occurred, so test discontinued. No signs of damage, or wear.

- **Competitor’s smooth bore FEP lined Rubber Covered Hose**
  - 9,149 cycles to failure.
  - Hose leakage caused by severe failure of the hose liner, breakage of the helix wire and damaged rubber and braid.

- **Competitor’s convoluted smooth flex type hose, SS Braid**
  - 7,151 cycles to failure.
  - Hose leakage caused by very severe failure of the hose liner and braid components.

These remarkable results confirm the claims made by Aflex, that Bioflex Ultra is the best designed, toughest and most reliable PTFE lined hose product available today.

*A video of the ‘Rolling U’ Test can be viewed on request from Aflex Hose*
**Temperature vs Pressure**

Due to its extremely strong construction, Bioflex Ultra has outstanding resistance to temperature and pressure, much higher than that of conventional convoluted PTFE lined hose.

**Maximum Working Pressure (MWP) Variation with Temperature:**

MWP for SS grade hose, also for RC, BK and SI grades are as given in the graph, BUT only within the temperature range for the particular grade of hose, as given below:

**Min/Max Operating Temperatures:**

<table>
<thead>
<tr>
<th>Hose Type</th>
<th>Grade</th>
<th>Min/Max Operating Temperatures</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bioflex Ultra GP or AS</td>
<td>SS</td>
<td>-99.4°F to +500°F</td>
</tr>
<tr>
<td>Bioflex Ultra GP or AS</td>
<td>SS,RC &amp; SS, BK</td>
<td>-40°F to +302°F</td>
</tr>
<tr>
<td>Bioflex Ultra GP or AS</td>
<td>SS, SI</td>
<td>-99.4°F to +399.2°F</td>
</tr>
<tr>
<td>Bioflex Ultra GP or AS</td>
<td>PB</td>
<td>MWPs for PB are as given in the table up to 176°F, then reduced by 50% between 176°F and 212°F (the maximum for PB). Min temperature -22°F.</td>
</tr>
</tbody>
</table>

**Temperature vs Vacuum**

All sizes and grades of Bioflex Ultra hose are usable at vacuum to -0.9bar up to 392°F (212°F for TO grades). Above this, the vacuum resistance should be reduced 2% for every degree above 392°F (212°F for TO grades).

**Flow Rates**

In practice, flow rates will vary with hose flexing, fluid viscosity, end fitting design and other parameters, but Bioflex Ultra hose flow rates are always around 2 times better than convoluted PTFE hose, when comparing hose assemblies with PTFE lined (non bore-restricted) end fittings.

**Bioflex Ultra Hose - Flow Rate Calculation**

If it is required to determine the flow rate of a particular hose assembly, or if it is required to determine the pressure required to generate a certain flow rate, then this can sometimes be approximately calculated by the Bioflex Ultra supplier.

It should be noted that calculations can only be made for fluids with a viscosity equal to water, and for hose assemblies with PTFE lined end fittings (no bore restrictions at the ends of the hose).

The following information should be given to the supplier:

To calculate the Flow Rate in Cubic Metres per Hour:

- Pressure in Bars at the Entry into the Hose Assembly (Subtracted to calculate Pressure Drop over the Hose Length)
- Pressure in Bars at the Exit from the Hose Assembly
- The hose configuration (roughly straight, or 33% Bends, or 66% Bends, or 100% Tightly Coiled)

**OR**

To Calculate the Pressure Drop in bars over the length of the Hose Assembly:

- Required Flow Rate in Cubic Metres per Hour
- The hose configuration (roughly straight, or 33% Bends, or 66% Bends, or 100% Tightly Coiled)

</tbody>
</table>

*The 7/8", 1 1/4" and 1 1/2" hose sizes are only suitable for use with PTFE lined sanitary clamp (or triclover) end fittings and PTFE lined J-Line end fittings.

**The Maximum Working Pressure of a hose assembly is limited to the lowest of the MWP's of either of the two end fittings, or of the hose itself as listed above. The MWP of the hose reduces as the operating temperature increases as specified in the Graph on the 'Bioflex Ultra Specification' page 7.

Note: 2 1/2" & 3" TO cannot be ordered as an assembly.
Bioflex Ultra Hose: Special Usage Conditions

- **Cleaning & Sterilising Systems - CIP, SIP and Autoclave**
  CIP & SIP – PTFE liner tubes are chemically resistant to all CIP, SIP and Autoclave conditions. A primary consideration is whether the cleaning and purging cycle is likely to develop an electrostatic charge on the internal surface of the liner, in which case AS (Anti-Static) grade hose is required.
  AS grade hose and Electrostatic charge generating systems are fully described in the hose liner section.
  CIP systems using high electrical resistivity solvents like Toluene will require AS grade hose.
  Another electrostatic generation problem arises when wet steam is passed through, or when the cleaning fluids or WFI are purged out of the line using nitrogen, compressed air or another gas, because droplets of liquid or water in the gas then generate a multi-phase condition until they are cleared out, which will generate a static charge, and so will require AS grade hose.
  In static generating applications where AS grade hose is not acceptable due to the black PTFE liner, alternative solutions may be available – please consult Aflex Hose for advice.

- **Autoclave**
  Autoclave sterilisation does not normally involve any high flow rates through the hose bore, so static generation is not a problem. Aflex hose grades GP and AS, with SS braids are fully resistant to all autoclave conditions throughout the service life of the hose.
  The rubber covered grades EPDM, (RC and BK) and Silicone Rubber (RC, SI) are able to withstand at least 300 x 30 minute autoclave cycles at relatively high autoclave temperatures (up to 135°C, 275°F). Please note that in robust applications covers may become more susceptible to tearing after extended autoclave cycles. Consult Aflex Hose for more specific information.

- **PTFE Hose-Use with Alkali Metals, Halogens and certain Halogens containing Chemicals**
  PTFE hose liners react chemically with Fluorine, Chlorine Trifluoride and molten Alkali Metals and so no hose grades are suitable for use with these chemicals.
  When PTFE lined hose is used to carry Chlorine or Bromine, either as gasses or fluids, trace quantities can diffuse into and through the PTFE liner wall thickness. These will then combine with atmospheric moisture to corrode any SS, PB or RC outside the liner tube. It has been found that Corroflon SP, HB or KY8 hose is best suited for these applications - Please consult the Corroflon brochure.
  Depending upon the internal pressures and temperatures, some other gasses and fluids with a high halogen content may also be transmitted in trace quantities through the wall of the PTFE tube, including Hydrogen Fluoride, Hydrogen Chloride, Carbonyl Chloride (Phosgene), Carbon Tetrachloride and others. Please consult with Aflex Hose for a suitable hose grade recommendation.

- **Other “Penetrating” Fluids and Gases**
  Sulphur Trioxide, Methyl Methacrylate, Caprolactam and Glacial Acetic Acid are some other chemicals which do not react chemically with the PTFE, but which can be absorbed and transmitted through the PTFE liner tube wall - please consult Aflex Hose for the optimum solution with these chemicals.
  Generally, however, as a hydrophobic (non-wetting) material, PTFE is very resistant to the absorption of chemicals. In some cases, PTFE has superior resistance to diffusion, for example to the diffusion of automotive fuels, in comparison with all other plastics and rubbers.

- **Gas/Fluid Cycling**
  There are some applications where fluids then gasses are passed through the hose, in a cyclic sequence.
  This is normally associated with changes in temperature and/or pressure. For complex reasons these conditions are extremely damaging to the hose liner, whatever material it is made from.
  For example, hoses are sometimes used to pass steam, water, steam etc into rubber moulding presses, in order to heat the mould, then rapidly cool it before reheating in the next cycle. Hoses of all types fail rapidly in such an application and PTFE lined hoses are no exception.
  Please contact Aflex Hose for further information if these conditions apply.

- **Connecting Assemblies for Use in Applications**
  The lengths of hose assemblies and their configuration in use when connected into the application must always be in accordance with the Hose Configuration information at the end of this product literature.
  When being connected for use in applications, the end fittings on hose assemblies must be connected to correct mating parts in the correct way, using the correct tools, spanners, clamps, nuts and bolts etc. The connections must be sufficiently tightened to ensure that the joint is leak free but not be over tightened as this can damage the sealing surfaces, especially with PTFE lined and flared end fittings.
  In applications involving the transfer through the hose of expensive or dangerous fluids or gases, the hoses and connections must be pressure tested in situ before being put in to service. This should be done with some harmless media to 1.5 times the maximum working pressure of the hose assembly, as stated in the product literature.
  If in doubt please contact Aflex Hose for advice.

- **Special Applications**
  Aflex Hose PTFE lined hose products are not rated as suitable for use in the following, special applications:
  - All Radioactive Applications involving high energy radiation, including Gamma radiation (degrades PTFE)
  - All Medical Implantation Applications.
  For Aerospace Applications, please contact Aflex for the appropriate hose choice.

- **Silicone-Free Application requirements**
  Some applications, particularly paint manufacturing plants, and other specialised applications require that hoses do not include any silicone containing materials in their manufacture, or sometimes that hoses are guaranteed to be 100% Silicone Free. Customers or Distributors must specifically identify and define any such requirements in writing on all enquiries/orders.
Quality Assurance, Certification and Approvals and Hose Testing

EN ISO 9001:2015
Aflex products are all manufactured in accordance with BS EN ISO 9001 Quality Management Systems independently assessed and registered by The British Standards Institution (BSI).

EN 16643:2016
Bioflex Ultra meets the requirements of EN 16643 (SC), which include the electrical and electrostatic requirements of hose assemblies.

IATF 16949:2016
Aflex Hose Ltd manufactures PTFE flexible hose for the automotive industry in accordance with IATF 16949 and is assessed and certified by The British Standards Institution (BSI).

ISO 14001:2015
Aflex Hose Ltd have been successfully assessed to the requirements of ISO 14001, by the British Standards Institution (BSI). By gaining this accreditation Aflex Hose Ltd are demonstrating our commitment to reducing our impact on the environment.

ISO 45001:2018
Aflex Hose Ltd have been successfully assessed to the requirements of ISO 45001, by the British Standards Institution (BSI). By gaining this accreditation Aflex Hose Ltd are demonstrating our commitment to the health and safety of our employees by consistently identifying and controlling risks to health and safety, reducing the potential for accidents, complying to relevant legislation and improving overall awareness throughout the business.

USP Class VI and ISO 10993-5, 6, 10 and 11 guidelines
Natural and Antistatic PTFE Hose Liners, Platinum Cured Silicone Rubber Covers (White and Clear) and EPDM Rubber Cover (Blue) have been independently tested in accordance with USP protocols and are found to conform to the requirements of USP Class VI Chapter <88>.
Natural and Antistatic PTFE Hose Liners now also meet the more stringent USP Class VI and ISO 10993-6,10 and 11 guidelines at 121°C (250°F) with a “no reaction” classification.
Natural and Antistatic PTFE Hose Liners and Platinum Cured Silicone Rubber Covers (White and Clear) have also been tested in accordance with USP protocols and are found to conform to the requirements of USP Class VI <87>, the L929 MEM Elution Test and are considered non-cytotoxic.
Natural and Antistatic PTFE Hose Liners have now been further tested and have passed the more stringent USP Class VI and ISO 10993-5 guidelines at 121°C (250°F).

USP <661> Physicochemical Test for Plastics
Natural and Antistatic (Carbon filled) Externally Convoluted Smoothbore PTFE hose has been tested in accordance with USP Physicochemical Test for Plastics and found to meet the criteria of the following reference: USP34, NF 29, 2011. Monograph <661> Containers, Physicochemical Test-Plastics.

FDA
The Materials used to manufacture the natural PTFE Tube liner conforms to FDA 21 CFR 177.1550, and the antistatic PTFE liner conforms to FDA 21 CFR 178.3297.

3-A Sanitary Standards 62-02
Bioflex Ultra hose assemblies accredited to 3-A Sanitary Standards 62-02 are identified within the product brochure.

BPSA leachables and extractables testing
Aflex Hose Natural and Antistatic PTFE Hose Liner Tube has been independently tested in accordance with BPSA recommendations, and found to be satisfactory.
Copies of the Test Report are available for specific assessments to be made.

Flame Resistant
To special order only, Aflex Hose are able to supply hose with a special rubber cover which is compliant with the requirements of BS EN 45545, DIN 5510 and NFF 16101 specifications.

Pharmaceutical Manufacturers Approvals
Most of the major pharmaceutical manufacturing companies in the world have audited and/or approved Aflex Hose as a Hose Supplier.

CE Marking (Europe only)
Aflex has been assessed by The British Standards Institution (BSI) and found to comply with the Pressure Equipment Directive 2014/68/EU Conformity Assessment Module D1, approved to CE Mark applicable hose products, accompanied by a Hose Usage Data Sheet, and a Declaration of Conformity.

Attestations of Conformity to ATEX Directive 2014/34/EU (Potentially Explosive Atmospheres)
Available for hose assemblies for components used in Gas Zones 1 & 2 and Dust Zones 21 & 22, when applicable.

Material Certification to EN10204
Available for all the hose or hose assembly components.

Certificates of Conformity to EN ISO/IEC 17050
Are available for all products.

Hose Testing
Each assembly is pressure tested to 1.5 times maximum working pressure before despatch, and pressure test certificates can be supplied.

Fire Resistance to BS55173 Section 103.13 Part 6.2 and 6.3
BK Grade Bioflex Ultra hose assemblies are “Fire Resistant”. If DRC-300 is added at both ends, the assemblies are upgraded to “Fire Proof”.

Food Contact
Manufactured in compliance with Regulation (EC) No 1935/2004 - on materials and articles intended to come in to contact with food. Commission regulation (EU) No 10/2011 - relating to plastic materials and articles intended to come into contact with food and Regulation (EC) No 2023/2006 - on good manufacturing practise for materials and articles intended to come in to contact with food.
How to Order Bioflex Ultra Hose & Hose Assemblies

How to Order

The quantity, hose size, liner, braid, cover, protection system, length and fittings must be selected and specified in full.

**EITHER** by a full, written description. The hose grade can be specified by the code initials e.g. “Bioflex Ultra AS, SS, RC, DRC-300” defines an antistatic PTFE lined hose with an EPDM rubber cover over a SS braid, with a double rubber cover at both ends.

The quantity, length and fittings can then be written in - e.g. “4 off x 1” bore Bioflex Ultra, AS, SS, RC, DRC-300 hose x 3.00 metres long. Both ends non-lined ANSI 150# S/S Flanges”.

**OR** by Part Numbers, as defined on page 13. Example from above “4 off Part No. 16-BFXU/AS-RC-00-3.00m-12-12, with DRC 300 at both ends”.

Any special requirements relating to the hose construction, or information required on Tags, or Certificates, or special testing of requirements, must be specified in full on the enquiry or purchase order.

Selecting the Hose Grade

There are two types of PTFE liner available, natural (GP) and antistatic (AS) and two types of braid; Grade 316 stainless steel (SS) and polypropylene (PB). These are described on page 15 & 16. Rubber covering and other external protection systems are also available, described on pages 17 & 18.

A hose grade is specified by using the abbreviations given. For example, Bioflex Ultra AS,PB would describe a hose with an anti-static PTFE liner and a polypropylene braid.

Selecting the End Fittings

Bioflex Ultra is available with a range of ‘standard’ end fittings (described on pages 19-33), normally supplied hygienically PTFE lined and flared.

Stainless Steel End Fitting Materials

- **Non-Lined Spigots** - are made from Grade 316L SS
- **PTFE Lined Spigots** - are made from Grade 316L or Grade 316C SS
- **Cam and Groove Female Fittings** - are made from Grade 316C SS (Body) and 316L SS (Spigot)
- **Swivelling Nuts and Flanges** - are made from Grade 304 SS
- **Ferrules** - most ferrules are made from Grade 304 SS, except some are made from Grade 316L SS - consult AH if necessary.

The equivalent specification for the different Grades of Stainless Steel are listed below:

### Specification Equivalents List

<table>
<thead>
<tr>
<th>Grade</th>
<th>BS - British Standard</th>
<th>AISI - American Standard or C = Casting Grade</th>
<th>EN - European Norm</th>
</tr>
</thead>
<tbody>
<tr>
<td>316L SS</td>
<td>BS 316 S11</td>
<td>AISI 316 L</td>
<td>EN 1.4404</td>

</tr>
<tr>
<td>304 SS</td>
<td>BS 304 S15</td>
<td>AISI 304</td>
<td>EN 1.4301</td>
</tr>
</tbody>
</table>

To special order, end fitting components can be made in non-standard grades of SS such as 1.4435, or other materials such as Hastelloy or Monel.

Conditions of Sale

Bioflex Ultra hose and hose assemblies are only supplied on the basis that the customer has read and accepted the Conditions of Sale as given on pg’s 41/42. Customers own Conditions of Sale (or equivalent) are not accepted unless an acceptance, signed by a Director of Aflex Hose is supplied.

Selecting the Hose Length (see also pages 39 - 41)

Bioflex Ultra hose assemblies are made up to the specific lengths required. The hose length is taken as the length from the sealing face at one end of the hose to the same at the other end. The length tolerance is normally +2% / -0%. Closer tolerances are available to special order.

* Listed minimum lengths are for the Bioflex Ultra Hose only, and DO NOT INCLUDE THE LENGTHS OF THE FITTINGS AT EACH END. These must be found from the end fitting pages and added to calculate the minimum length of the hose assembly.
† Longer lengths may be available to special order.
The hose assembly electrical property grades and electrical resistance limits are defined within EN 16643 and tested in accordance with BS EN ISO 8031. Aflex Hose electrically conductive (EC) assemblies are defined in EN 16643 as *electrically bonded* and given the symbol M. M-grade assemblies exhibit a maximum electrical resistance of 100Ω between end fittings. Aflex Hose anti-static (AS) PTFE liners and rubber covers are termed *static dissipative* within EN 16643 and given the symbol Ω followed by letters that specify either the liner, cover or both; L=liner, C=cover, CL= cover & liner. Ω-grade covers or liners exhibit an electrical resistance of $10^3-10^8$Ω.

The table below identifies each EN 16643 electrical grade for a hose assembly along with a brief description and example assembly configuration.

</tbody>
</table>

**Notes**

- **For Flange only**: Add ’/ZP’ for Carbon Steel Zinc Plated, or add ’/EC’ for Epoxy coated

- **Elbows**: For all types of Elbow fittings add ’/90°’ for 90° elbows

- **Triclamps**: For ‘Hot Formed’ PTFE Lined Triclamps add ’/HF’

- **Additional Requirements**:
  - Any additional requirements which are not included in the Part Number must be written out in full in the Order, including any special labelling or colour coding.
  - When purchasing Triclovers/Sanitary Fittings please specify the surface finish required.

**Example:**

A 3/4" bore Bioflex Ultra GP, RC Hose Assembly with an Antistatic PTFE Liner and an outer Safeguard Sleeve with:

End (1) - a 3/4" ANSI 150# Swivel Flange, PTFE Lined

End (2) - a Cam and Groove Swivelling Female, PTFE Lined

and a Length of - 4ft 6 inches

**Hose Assembly Part No. =** 12 - BFXU/AS - RC - 54in - 12L - 16L

**Notes**

- When purchasing Triclovers/Sanitary Fittings please specify the surface finish required.
Bioflex Ultra Hose Liners

*GP - General Purpose Liner

**Purpose**
Bioflex Ultra GP is the ‘General Purpose’ grade, for use in all applications where fluids or gases are being conveyed which do not generate a risk of static charge development (see “AS”).

**Design & Approvals**
A full list of Approvals is given on Page 11.

Bioflex Ultra GP is a virgin PTFE liner, manufactured from hose grade PTFE which conforms to the requirements of:

- FDA 21 CFR 177.1550
- Bioflex Ultra GP hose liner tube has also been tested, and complies with USP Class VI, at 37°C (99°F), 70°C (158°F) and at 121°C (250°F) - see page 11.
- Bioflex Ultra GP and AS PTFE Liner Tubes have also been tested for Leachables and Extractables in accordance with BPSA recommendations, and were found to be satisfactory.

**EC - ELECTRICAL CONTINUITY**
(Also known as ‘Electrically Bonded’)

All Bioflex Ultra hose assemblies are electrically continuous, except TO grade hose assemblies. Electrical Continuity requires that the hose assembly supplied is electrically continuous, or conductive, between metal end fittings at each end of the hose (whether GP or AS grade).

The requirements for this are specified in the German Document BRG 132 and EN 16643, when tested in accordance with EN ISO 8031, which requires that the resistance between end fittings shall be <100 Ohms per assembly. For hose assemblies which meet this requirement a Grade “M” marking is applied in accordance with EN 16643.

Grade TO (Tube Only) hose assemblies are not normally EC (Electrically Continuous), which means that the electrical resistance between end fittings will usually be more than 100 ohms. However, if EC or non-EC are specific requirements for the TO hose assembly, then it is possible to ensure either, but only if the requirement is discussed in detail with Aflex Hose at the enquiry stage.

*AS - Anti-Static PTFE Liner

**Purpose**
Bioflex Ultra AS is an essential requirement in applications where there is the risk of an electrostatic charge build-up on the inside surface of the PTFE tube which may then discharge through the tube wall. Media passing through which create such a risk are fluids which have a Conductance of less than $10^{-8}$ S/m (Siemens per Metre), or $10^{4}$ pS/m such as fuels, solvents, freons, some WFI (ultra-pure “Water for Injection”) and non-polar organics which are being transferred at a medium to high flow velocity.

All twin and multi phase media, and any non-mixing media, such as powder in air, or water droplets in steam, in gases or in oil, also colloidal fluids constitute a particular hazard for static charge generation, and always require grade AS.

If in doubt, either order AS grade, or consult Aflex Hose.

**Design & Approvals**
Bioflex Ultra AS is an anti-static PTFE liner manufactured from FDA 21 CFR 177.1550 approved PTFE, mixed with less than 2.5% of ‘high purity’ Carbon Black material to FDA requirement 21 CFR 178.3297. Bioflex Ultra AS grade also meets the requirements of EC Directive 2007/19/EC. The carbon is encapsulated by the PTFE, and in normal, non-abrasive applications will not come loose to contaminate any fluid passing through.

Bioflex Ultra AS also conforms to USP Class VI, at 37°C (99°F), 70°C (158°F) and at 121°C (250°F) - see page 11.

**Antistatic Hose Assemblies**
When “AS” (Antistatic) grade hose is specified, then the hose or hose assembly supplied will be tested in accordance with EN ISO 8031 and meet the Antistatic requirements of EN 16643. This requires, for an antistatic liner or antistatic cover, that the resistance between an appropriately placed foam electrode and a metallic end fitting will be between $10^3$ to $10^6$ ohms per assembly. For hose assemblies which meet these requirements an appropriate Grade “Ω” marking is applied in accordance with EN 16643.

**Note:** When in service, at least one end fitting must be connected to earth, to permit dissipation of the static charge from the end fitting.

*EXCEPTIONS -

The 3/8” hose size is not changed from the original Bioflex design. The hose liner tubes do not therefore, have increased bore size, and does not include a helical wire reinforcement as shown.
Bioflex Ultra Hose Braids

TO - Tube Only (no braid)

Purpose
TO grade hose (available in both GP and AS) is a lightweight hose, used in applications where working pressures are low and where there is no need for the physical protection offered by an external braid. TO grade tube is vacuum resistant to -0.9bar up to 100˚C.

Note: 2½” & 3” TO cannot be ordered as an assembly.

PB - Polypropylene Braid

Purpose
Polypropylene braided hose is often preferred to SS in applications involving frequent handling and movement of the hose, and where temperatures are within the range -30˚C and +100˚C (-22˚F to +212˚F). PB braid is lighter in weight, and any broken strands will not cut the operator’s hands. In addition, PB braid is not prone to “chloride stress corrosion”, and has generally good chemical resistance.

To ensure Electrical Continuity (EC) between end fittings 2 strands of Monel wire earthing strips are criss-crossed on to the liner, underneath the Polypropylene Braid. These are folded back underneath the ferrule at both end fittings, to make an electrical contact.

Note: Prolonged exposure to sunlight eventually results in UV degradation of PB braid.

SS - Stainless Steel Braid

Purpose
Stainless Steel braided hose is the general purpose product, and can be used in applications involving high temperatures and working pressures. High tensile AISI 316 stainless steel wire is used, to give maximum pressure resistance and external protection to the hose.

Note: Previously, Bioflex HB (Hastelloy Braid) and KYB (Kynar Braid) were available, particularly for chlorine applications. It has been found however, that customers prefer the Corroflon product for such applications - please refer to the Corroflon brochure.
**Bioflex Ultra Rubber Covers**

**RC - Blue EPDM Rubber Covered**

**Purpose**
For the most rugged applications where the hose may be subjected to rough treatment and severe external abrasion. Also for hygienic applications, where the external smoothness and cleanability of the hose is of prime importance.

**Design**
An SS braided hose assembly has a smooth finish, blue EPDM external rubber cover extruded over and vulcanised directly onto the braid. EPDM has excellent chemical resistance, and the hose has a temperature range from -40˚C, -40˚F up to +150˚C, +302˚F. Alternative colours of rubber, and strips with alternative text titles are available to special order.

**Specifications**
The Blue EPDM rubber cover has been tested and conforms to the requirements of USP Class VI.

**Limitations**
Rubber covers are only applicable to SS braided hose.

**SI - Platinum Cured Silicone Rubber Cover**

**Purpose**
As for RC hose, but where the hose may be required to withstand temperatures from -73˚C, -100˚F up to +204˚C, +400˚F. SI grade hose is semi-transparent, allowing visual monitoring of the braid.

**Design**
An SS braided hose assembly has a platinum cured silicone rubber cover extruded directly onto the braid, with a very smooth external surface finish to aid cleaning.

**Specifications**
The Silicone rubber cover has been tested and conforms to the requirements of USP Class VI.

**RC-300 - Rubber Covered 300mm Long End Protection**

**Purpose**
In applications where excessive flexing of the hose at the end fitting occurs, it is sometimes necessary to ‘stiffen’ the hose in this area, to prevent kinking.

**Design**
A layer of rubber is applied and vulcanised directly to the ferrule, and 300mm (12 inch) along the hose from the fitting. This can be done either on an SS braided hose (RC-300) or on a rubber covered hose to form a 300mm (12 inch) long double layer of rubber at the end (DRC-300).

The rubber used is normally Blue EPDM, but if the hose is BK, or SI covered, then the same type and colour of rubber would be used (DBK-300 or DSI-300).

**Limitations**
Cannot be applied to PB braided hose. If required for a PB hose, consult Aflex Hose for an alternative “EPR” system. (EPR includes a 300mm (12 inch) length of loose rubber hose jubilee clipped to the ferrule).
Bioflex Ultra External Protection Systems

SG - Safegard Protection Sleeve

Purpose
To protect the hose against external abrasion and mechanical damage. For use in applications where maximum external protection is required with minimum extra hose weight. Particularly useful with PB hose, where a rubber cover is not an option.

Design
A lightweight black, HDPE (High Density Poly Ethylene) strip spirally wound around the outside of the hose over its whole length, secured to each end fitting by crimping under a SS ferrule.

Limitations
Safegard is applicable to all hose grades and all hose sizes from ½" up to 2".

Safegard is limited to use within a temperature range from -40°C (-40°F) up to +110°C (230°F). Internal fluid temperatures up to 140°C (284°F) are acceptable, when external temperatures are ambient.

The minimum hose assembly length must be doubled if Safegard is being used. The maximum assembly lengths for all sizes are capped at 20 metres (65 feet).

Other hose usage limitation specifications are not altered by the addition of Safegard.

Safegard is available with anti-static properties and complies with the requirements of a static-dissipative cover within EN 16643 (see page 13 for further information). Request details upon enquiry.

SR - Scuff Rings

Purpose
For medium duty applications where the hose requires some protection against abrasion when dragged over the ground, but where a full rubber cover would be too heavy and cumbersome. Also for PB braided hose, which cannot be Rubber Covered.

Design
Specially moulded abrasion resistant rubber scuff rings are placed every half metre along the hose.

Limitations
Available for hose sizes 1" (25mm) to 2" (50mm) only. The operating temperature should not exceed 140°C (284°F) (internal).

PC - Protection Coil

Purpose
For applications where the hose requires protection against abrasion when dragged over the ground, but where any rubber reinforcement is not permissible due to temperature, chemicals etc.

Design
A stainless steel wire helix is wound onto the braid and welded to the ferrules at each end.

Limitations
Available for all sizes and Grades of Bioflex Ultra Hose including rubber covered grades.

Maximum assembly lengths for all sizes are capped at 30 metres (100 feet).

Specifications
As for the relevant Hose Grade.
Bioflex Ultra Non-Lined Swivel Flange Fittings

Flange Specifications
- ANSI B16.5 (also ASME B16.5) Class 150# and 300#
- *DIN PN10, PN16 and PN40
- JIS 10K
- Other Pressure Ratings and Flange Specifications are also available.
  *DIN PN10, PN16 and PN40 Flanges all have the same dimensions, and so are fully interchangeable

End Fitting Materials
- Flanges normally in Grade 304 SS, or Grade 316 SS if required
- Flange Retainers in Grade 316L SS
- Ferrules, most in Grade 304 SS, some sizes in Grade 316 SS

Alternative Options for Flange Component only:
- Zinc Plated Carbon Steel

Surface Finish:
- All surface finishes are to ASME BPE-SF-O (No finish required).
- If a specified finish on a particular surface is required, please state on the enquiry and order.

Maximum Pressure Ratings
- ANSI 150# = 16 Bar (230 psi), ANSI 300# = 41.4 Bar (600 psi)
- DIN PN10 = 10 Bar (145 psi), DIN PN16 = 16 Bar (230 psi)
- DIN PN40 = 40 Bar (580 psi)

‘Step-Up’ PTFE Lined Flange Fitting Design for Bioflex Ultra Hose

Because Bioflex Ultra Hose has better flow rates than some larger bore sizes of Convoluted PTFE hose, it represents a superior alternative when fitted with the larger size flanges in some applications.

It is, however, necessary to also “Step-Up” the PTFE-lined bore, to ensure a diameter match with the mating connector.

This is best achieved using a solid PTFE Adaptor Plate, as shown in the drawing.

Example: a 2” hose to 3” ANSI 150# PTFE Lined Flange Joint >
Bioflex Ultra Female Cam & Groove Fittings
PTFE Lined & Non-Lined

End Fitting Specifications
- Generally in accordance with A-A-59326 (replaces MIL-C-27487) and EN14420-1 (replaces DIN 2828), and all are fully interchangeable.

End Fitting Materials
- Spigot in Grade 316L SS
- Body in Grade 316C SS
- Ferrules, most in Grade 304 SS, some sizes in Grade 316L SS
- Standard Gasket is Buna N (Nitrile) Rubber.
- FEP encapsulated Silicone Rubber Gaskets also available.

Surface Finish: (Non-Lined Fittings only)
- All surface finishes are to ASME BPE-SF-O (No finish required).
- If a specified finish on a particular surface is required, please state on the enquiry and order.

**Temperature and Pressure Ratings**
- When used with a Buna N Gasket all sizes up to 16 Bar (230 psi) and up to a maximum temperature of 65°C (149°F)
- When used with FEP, Fluoro Rubber or other encapsulated gaskets all sizes up to 10 Bar (145 psi) and up to a maximum temperature of 204°C (400°F).

90° Elbow Cam & Groove Fittings (PTFE Lined Only)
- 90° Elbow Integral PTFE lined Cam & Groove Fittings are available for sizes 1", 1 1/2" and 2" - see page 33.

Notes: For Integral PTFE Lined Fittings Only
- FEP Gaskets require higher clamping forces to flatten the Seal and make the joint. This is made easier by "pre-setting" these gaskets by clamping Polypropylene Cam Male Inserts to the assembled fittings, which must then be kept in place during storage, until use.
- Any Customer's Own "Special" Gaskets must be pre-supplied to Aflex for special assembly and testing of hose assemblies, to ensure suitability.

**Swivelling, Locking Arm Female Cam and Groove Fittings - Non-Lined**

PTFE Lined Male Cam & Groove X Flange Adaptors

PTFE Lined Male Cam & Groove X Flange Adaptors

PTFE Lined Male Cam & Groove X Flange Adaptors

PTFE Lined Male Cam & Groove X Flange Adaptors

PTFE Lined Male Cam & Groove X Flange Adaptors

Note: Other Flange Specifications and Pressure Ratings are also available. Non-Lined adaptors and Female Cam & Groove X Flange Adaptors are also available, to special order.
**Bioflex Ultra Sanitary Triclamp (Triclover) Fittings**

PTFE Lined, Flared and Hot Formed

**Introduction**

Advantages are - unrestricted clean flow of fluids, no fluid entrapment areas, and all PTFE wetted surfaces internally. Available as standard, stocked fittings in the listed sizes, or in other sizes to special order.

**End Fitting Specifications**

- ASME BPE
- DIN32676
- BS4825 Pt 3 - equivalent to ASME BPE
- ISO 1127

**Note:** The inside lip of the Aflex flared face design is hot formed to a square edge. This prevents a gap for fluid entrapment between the rubber seal and the sealing face. Other suppliers designs have rounded edges, which opens a gap for fluid entrapment.

**End Fitting Materials**

- Fittings in Grade 316L SS (= BS 316 S11 = EN 1.4404)
- Ferrules, most in Grade 304 SS, some sizes in Grade 316L SS

**Temperature and Pressure Ratings**

- Pressures up to 16 Bar (230 psi)
- Temperatures up to 120°C (250°F) with EPDM Gaskets
- Temperatures up to 180°C (356°F) with PTFE, Silicone or Viton Gaskets
- Higher Pressures & Temperatures possible with Special Clamps and appropriate Seals.

**‘Beaded’ Triclover Fittings**

This fitting design is available to special order. No separate seal is required for this design, eliminating any seal compatibility problems.

* Fitting Lengths listed are for Bioflex Ultra RC, SI and BK hose grades. Shorter lengths apply for other hose grades.

** 3A - For assemblies with nominal hose bore under 0.75", the maximum assembly length is 457mm (18in) and can only be supplied specifically for 3-A Standard 17 - and - 23- compliant filling and packaging machine applications. For more information on 3A fittings see page 34.

**Note:** The 7/8", 13/8" and 17/8" hose sizes can only be supplied as assemblies with lined Sanitary Triclover (or I-Line fittings) at BOTH ends, because other types of fittings (Flange, Camlocks etc) are not available for these sizes of hose.
Bioflex Ultra Sanitary Triclamp (Triclover) Fittings
Not PTFE Lined

Introduction
There are many different specifications, dimensions and surface finishes for triclamp fittings. Triclovers are covered by various standards, the most widely used are in the tables displayed below. However most standards can be supplied if given the information below. Triclovers can be supplied as 3A.

- Flange diameter D and Outlet diameter I
- Hose size if known, or Aflex can recommend a hose size to suit
- The internal Surface Finish, Standard if known.

Standards
- DIN 32676 SERIES A
- DIN 32676 SERIES B (ISO 127)
- DIN 32676 SERIES C (ASME BPE)

End Fitting Materials
- Fittings in AISI 316L = EN 1.4404 = BS 316 S11
- Ferrules, most in Grade 304 SS, some sizes in Grade 316L SS
- Fittings for DIN32676 are available in 1.4435 (316L)
- Fittings for DIN32676 in 1.4571, Hastelloy, Monel, PVDF and other materials to special order

Temperature and Pressure Ratings
- Pressures up to 16 Bar (230 psi)
- Temperatures up to 120°C (250˚F) with EPDM Gaskets
- Temperatures up to 180°C (356˚F) with PTFE, Silicone or Viton Gaskets
- Higher Pressures and Temperatures with Special Clamps and Gaskets.

Internal Surface Finish Specifications
- ASME BPE SF3 (mechanical polish, not electropolished) Surface Finish, Maximum reading: <0.76µm Ra = <30µ in. Ra
- ASME BPE SF4 (mechanical polish and electropolished) Surface Finish, Maximum reading: <0.375µm Ra = <15µ in. Ra (SF4 is the highest level of surface finish specified in ASME BPE, and the standard, stocked fittings listed are all to this finish).
- DIN 32676 H4 (mechanical polish, not electropolished) Surface Finish, Average reading: <0.4µm Ra = <16µ in. RA

*Fitting Lengths listed are for Bioflex Ultra RC, SI and BK hose grades. Shorter lengths apply for other hose grades.
Bioflex Ultra Sanitary Triclamp (Triclover) Fittings - 90° Elbow
Not PTFE Lined

End Fitting Specifications

- BS4825 Pt 3
- ASME-BPE-a
- Others to Special Order

End Fitting Materials

- Fittings in Grade AISI 316L = EN 1.4404 = BS 316 S11
- Ferrules, most in Grade 304 SS, some sizes in Grade 316L SS

Surface Finish:

- The internal surface is to ASME BPE-SF-3
  (<0.76 µm Ra, not electropolished).
- If a specified finish on a particular surface is required, please state on the enquiry and order.

Outlet Diameters

The outlet diameters as listed are in accordance with BS4825. The ASME specification, however, requires these diameters to be 0.005” (0.125mm) less in each case. An Outlet Diameter tolerance of +0.000 -0.005” has therefore been applied, so that the same fitting satisfies requirements of both specifications.

Temperature and Pressure Ratings

- Pressures up to 16 Bar (230 psi)
- Temperatures up to 120˚C (250˚F) with EPDM Gaskets
- Temperatures up to 180˚C (356˚F) with PTFE, Silicone or Viton Gaskets
- Higher Pressures and Temperatures with Special Clamps and Gaskets.

Bioflex Ultra DIN11851 Male & Female Fittings
Non-Lined

Specifications
- Generally to German DIN 11851 specifications.

Temperature & Pressure Ratings
- Sizes up to 1 1/2" MWP = 40 Bar (580 psi) up to 140˚C (284˚F)
- Sizes 2" to 3" MWP = 25 Bar (360 psi) up to 140˚C (284˚F)

Except: where the applicable hose pressure/temperature ratings are lower (page 7).

End Fitting Materials
- Spigots in Grade 316L SS (Non-Lined Spigot in 1.4571)
- Nuts in Grade 304 SS
- Ferrules, most in Grade 304 SS, some sizes in Grade 316L SS

Surface Finish: (Non-Lined Fittings only)
- All surface finishes are to ASME BPE-SF-3>0.76µm Ra, mechanical polish.
- If a specified finish on a particular surface is required, please state on the enquiry and order.

† 3A approved for CIP when used with approved gaskets.
Bioflex Ultra DIN11851 Male & Female Fittings
PTFE Lined

Description
DIN11851 male and female fittings, integral PTFE lined and flared. The PTFE sealing face is hot moulded into the correct shape, designed to achieve the optimum pressure seal. 90° elbow PTFE lined fittings are available for some sizes and grades - see page 33.

Specifications
• Generally to German DIN 11851 specifications.

Note: The PTFE lined male fitting is designed to be used without a rubber seal. Please note that when connecting to a PTFE Lined DIN 11851 Male, extra spanner tightening of the nut is sometimes required in order to provide a leak free connection.

*Fitting Lengths listed are for Bioflex Ultra RC, SI and BK hose grades. Shorter lengths apply for other hose grades.
Bioflex Ultra BSP 60° Cone Seat Female Unions and BSP Flat Face Lug Nut Female Fittings

End Fitting Specifications
- BSPP Threads to British Standard Pipe Parallel Thread design to BS21, 60° Cone Seat design, or Flat Seat.

Alternatives:
- Cone Seat Female Union Fittings can be supplied with a BSPP BSPT Taper Male Adaptor if required.

End Fitting Materials
- Spigots in Grade 316L SS
- Nuts in Grade 316L SS
- Ferrules, most in Grade 304 SS, some sizes in Grade 316L SS

Alternatives:
- Hydraulic design Cone Seat Female Unions can be supplied in Zinc Plated Carbon Steel to special order.
- Lug Nuts can be supplied in Gun Metal (Bronze) if required.

Surface Finish:
- All surface finishes are to ASME BPE-SF-O (No finish required).
- If a specified finish on a particular surface is required, please state on the enquiry and order.

Bioflex Ultra 37° JIC Female Fittings and Male & Female NPT Unions

End Fitting Specifications
- SAE J514 37° Flare JIC Female Fitting
- 37° JIC Male-to-NPT Male/Female Adaptors
- NPT Threads to ANSI/AMSE B1.20.1

Temperature and Pressure Ratings
- Same Maximum Working Pressure and Temperature as for the relevant size of Bioflex Ultra Hose, on page 7.

Note:
- Not usable with SAE 45° Flare fittings which have the same thread.

End Fitting Materials
- Spigots in Grade 316L SS
- Nuts in 316L SS
- Ferrules, most in Grade 304 SS, some sizes in Grade 316L SS

Alternatives:
- Available in other materials to special order

Surface Finish:
- All surface finishes are to ASME BPE-SF-O (No finish required).
- If a specified finish on a particular surface is required, please state on the enquiry and order.

Fixed Dip Pipes

Description
Fixed Dip Pipes are fairly rigid, thick wall PTFE tubes, either straight or 90° elbowed, which are directly crimped to the end of Bioflex Ultra hoses. They are designed for insertion into drums, tanks and reaction vessels in order to suction drain (or inject) process fluids transferred through the hose.

Materials
- Standard dip pipes are in anti-static (AS) PTFE
- Ferrules, most in Grade 304 SS, some sizes in Grade 316L SS

How to order
Specify the size and material of the dip pipe, whether it is straight or 90° elbowed. Give the length of the straight leg of the dip pipe and the length of the rest of the hose assembly separately.

Maximum Working Pressures
Dip Pipes are normally only tested to 6 Bar Pressure, and are not suitable for use at pressures higher than 3 Bar. They are usable at negative pressure up to -0.9bar vacuum.
If higher pressure ratings are required, consult Aflex Hose.

Lengths
Dip Pipes are supplied as standard in 1 metre straight lengths, but can be supplied in any length to individual requirements.

Detachable Dip Pipes

Description
As Fixed Dip Pipes above, but connected to the hose through an end fitting, not by crimping direct to the hose.

Design
A straight, or 90° elbowed anti-static PTFE Dip Pipe, fitted with a Flange or Cam & Groove Male PTFE Lined & Flared end fitting.
The most usual end fitting is a Cam Male (as shown), so the dip pipe can then be connected to a hose with a Cam Female end fitting.

Specifications
As above for Fixed Dip Pipes
**PTFE Lined 90° Elbow Fittings**

All of the PTFE lined end fittings described on previous pages can be fitted as 90° elbow PTFE lined fittings to the design shown, to the sizes listed.

- All grades of hose can be used, except PB.

**Non-Lined 90° Elbow Fittings**

A 90° elbow attached to the hose can be supplied non-PTFE lined, as shown, for any size or grade of hose or type of fittings, to special order.
3-A Sanitary Fittings

3-A Sanitary standards require the hose end fitting to be sealed against the ingress of external fluid into the fitting construction. Aflex Hose have implemented a silicone seal between the ferrule and fitting to address this requirement. The direct crimp style fitting does not incorporate the silicone seal as standard and a modified version of the fitting for 3-A is required.

When ordering customers should specify that the hose assembly must meet 3-A sanitary requirements. The 3-A symbol and appropriate marking to 3-A requirements will be applied to the hose assembly.

Bioflex Ultra covered hoses are soakable in both standard and 3-A sanitary configurations. The 3-A assembly is only available with an EPDM or silicone cover.

The Aflex Hose 3-A certificate is available to view on our website in the ‘certifications’ section.

Specifications for the above fittings can be found on the relevant fitting pages.
**Bioflex Ultra Insulated Hose Assemblies**

**Purpose**
For use in Industrial, Chemical, Pharmaceutical and Biopharma applications where cold media passing through the hose can result in condensation forming on the outside of the hose, which may be undesirable within the application. The insulated hose can also be used with hot media to limit heat losses and to limit the external temperature of the hose for the protection of operators. Unlike other designs the insulation and cover is integral to the hose design and will stay in place throughout the hose life.

**Description**
The base hose comprises of a braided hose assembly. The insulated element comprises of a standard 12mm closed-cell fire resistant silicone foam rubber spirally wrapped around the hose, completed with a black EPDM rubber (matt finish) cover or a wipe clean Platinum Cured Silicone Cover (semi-transparent).

**Design**
Each hose is custom designed and built to suit the requirements of the particular application. Other applications can be considered please consult our technical department.

**Specification**
As for Bioflex Ultra GP, SS on pages 8 and 9, except that the minimum bend radius is increased by approx. 25%, there is an increase on the O/D of approx. 25mm and there will be a slight increase in the complete weight of the assembly. The media temperature range as per Bioflex Ultra with a stainless steel braid.

**Limitations**
Minimum Aflex Insulated hose assembly length 750mm.
Maximum Aflex Insulated hose assembly length 20mtrs ((Where maximum length for the hose size permits).
Not suitable for applications where exacting temperature control is required. See CH and ETH section for these applications.
Bioflex Ultra Steam Heated Hose Assemblies  
(CH Grade)

**Purpose**
For use in applications where the temperature of the process fluid must be maintained as it passes through the hose. This is usually required to prevent solidification or an increase in fluid viscosity. Steam heating is preferred to electrical heating in some applications for reasons of availability or safety, but is less controllable.

**Description**
The heating element comprises a small diameter PTFE heating hose, 1/4" or 3/8" bore size, with a single SS wire braid. This is spirally wrapped around the hose, with inlet and outlet ports attached, either both at one end or at opposite ends of the hose assembly. In the case of hose assemblies longer than 3 metres, it is usual to have several heating hoses with inlet ports at opposite ends and along the hose. This reduces the effects of temperature loss over the length of the Hose Assembly. The thermal insulation is usually closed-cell silicone foam rubber. The outer cover is a SS wire braid with a rubber cover if necessary.

**Design**
Each hose is custom designed and built to suit the requirements of the particular application. The following information is therefore required:

- Fluid in Hose Assembly
- Maintained Temperature of Fluid in Hose
- Temperature of Steam or Fluid in the Heating Hose
- Min/Max Ambient Temperature
- Pressure/Vacuum Applied to Fluid
- External Conditions of Abrasion etc

**Specifications**
As for Bioflex Ultra GP, SS on pages 8 and 9, except that the minimum bend radius is tripled, and the outside diameter and weight are significantly increased in line with the particular design. The maximum length of a CH/ETH hose is 10m (33ft).

**Limitations**
1” PTFE lined PN10 flange spigots on heated hoses can only have a maximum flare diameter of 50mm, not 63mm.

If the hose is “hanging”, straight or at 90°, under its own weight, special construction is required, so advise Aflex Hose accordingly.

Minimum CH Hose Assembly Length 750mm.
Bioflex Ultra Electrically Trace Heated Hose Assemblies (ETH Grade)

Purpose
For use in applications where the temperature of the process fluid must be regulated as it passes through the hose. In some applications, an additional 'melt out' facility may also be required.

Description
The heating element comprises either a resistance or self-regulating element spirally wrapped around the hose assembly. Self regulating elements may require a sensor and controller if a specific maintain temperature is required. Please consult Aflex Hose for clarification. Resistance element heated hoses usually also require a temperature sensor to be built in to the construction and must be used in conjunction with a temperature controller. The power leads and (if applicable) temperature sensor leads emerge from the hose assembly at one end, through glands and conduits. The thermal insulation is foam rubber, silicone foam rubber for temperatures above 80°C (176°F). The outer cover may be a polypropylene yarn or SS wire braid with a rubber cover if necessary.

Design
Each hose is custom designed and built. Application details must be supplied by filling in an “ETH Hose Questionnaire”, available from Aflex Hose. Generally, for Hazardous Areas, particularly “ZONE 1”, the Self Regulating type of heating element is employed, with or without a temperature sensor and control, and flameproof glands and conduit are also required. The watts per metre of the heating element, the pitch of the spiral on the hose, and the thickness of the thermal insulation are all calculated in accordance with established formulae to give the required maintained temperature.

Specifications
As for Bioflex Ultra GP, SS on pages 8 and 9, except that the Minimum Bend Radius is tripled and the outside diameter and weight are significantly increased in line with the particular design. The maximum length of a CH/ETH hose is 10m (33ft).

Limitations
1” PTFE lined PN10 flange spigots on heated hoses can only have a maximum flare diameter of 50mm, not 63mm.
If the hose is “hanging”, straight or at 90°, under its own weight, special construction is required, so advise Aflex Hose accordingly.
Minimum ETH Hose Assembly Length, when collars are used 750mm.
Bioflex Ultra Standard & Streamline Tagging and Colour Coding Systems

**Standard Labelling**

All Bioflex Ultra hose assemblies are labelled with the following information:

- Manufacturer’s Name (Aflex Hose Ltd)
- Hose Size and Grade
- EN16643 and year of standard publication
- EN16643 electrical property grade
- Max. Working Pressure and test pressure
- Working temperature range*
- Unique Serial Number
- Month & Year of Manufacture
- Aflex Hose Telephone Number
- CE Mark (if applicable)

*Note any restrictions on working pressure resulting from elevated temperatures.

This information is normally laser-etched on to the ferrule.

In some cases, at the discretion of Aflex Hose, the information may be etched on to a thin stainless steel plate which is clamped to the hose, or a loose stainless steel ring mounted on the hose. This may be necessary for example, if the customer requires additional information which may not fit on to the ferrule.

Customers may specify which labelling system they require, and may request additional information on the label.

**Streamline Tagging**

This system is only applicable to the Silicone (SI) rubber covered grades of Bioflex Ultra that have a stainless steel (SS) braid.

A label and/or Colour Code is placed around the silicone cover of the hose and then encapsulated by a transparent silicone that is formed into a thin streamlined cover.

Note: ½” size, Colour Code only, no text.

**Colour Coding**

This system is applicable to all grades of Bioflex Ultra hose.

A coloured PTFE spiral strip is wound on to the hose.

It can be left loose, or it can be encapsulated under a transparent, heat-shrunk polyolefin sleeve.
Hose Configuration Requirements

Hose Assemblies are usually connected at both ends in service. They may then either remain in a fixed, or static configuration or in a flexing, or dynamic configuration.

Whether static or dynamic, the First Rule concerning the configuration of the hose is that the bend radius of the hose must never be less than the Minimum Bend Radius (MBR) for the hose as listed in the relevant hose brochure.

The most common situation when this is likely to occur is when the hose is flexed at the end fitting, with stress being applied to the hose at an angle to the axis of the end fitting. Typically, this happens either because the length of the hose is too short, or because the weight of the hose plus contents creates a stress at an angle to the end fitting.

The Second Rule, therefore, if possible, is to design the configuration to ensure that any flexing in the hose takes place away from the end fittings.
The Third Rule is that the hose configuration should always be designed, and supported where necessary, to avoid any possibility of external abrasion. In some cases, the length, configuration and angle of the hose can be designed to avoid abrasion. In others, static or moving support frames or support wheels are required.

**INCORRECT** - Abrasion against hose

**INCORRECT** - Abrasion inside support

**CORRECT** - No hose abrasion

**CORRECT** - No abrasion over support

The Fourth Rule is that the hose must not be subjected to torque, either during connection, or as a result of the flexing cycle. Torque (twist) in the hose can be applied during connection if the hose is accidentally twisted, or if the second end being connected is a screwed connection, and the hose is subjected to torque during final tightening.

In a flexing application, if any flexing cycle of the hose occurs in 3 dimensions instead of 2, then torque will also occur:

**CORRECT** - Flexing movement takes place in 2 dimensions

**INCORRECT** - Flexing movement takes place in 3 dimensions so torque is applied
Calculating the Hose Length

The formula for calculating the bent section of the hose length around a radius is derived from the basic formula that the circumference of a circle = 2πR, where R = the radius of the circle, and π = a constant, = 3.142.

So, if the hose goes around a 90° bend, which is 1/4 of a full circumference, and the radius of the bend is R, then the length of the hose around the bend is = 1/4 x 2πR. Or half way round, in a U-shape, = ½ x 2πR.

Note:
In calculating the length of a hose assembly, the (non-flexible) length of the end fittings must be added in, also the length of any straight sections of hose, as in the following example:

Example:
To calculate the length for a 2" bore size hose with flange end fittings, to be fitted in a 90° configuration with one leg 400mm long, the other 600mm long.

Length of Bent Section (yellow) = 1/4 x 2πR (334)
= 1/4 x 2 x 3.142 x 334 = 525mm

Length of top, Straight Section, including the top end fitting length
= 600 - 334 = 266mm

Length of bottom end fitting = 66mm

Total length of Hose Assembly = 525 + 266 + 66 = 857mm

Things to consider
(a) A hose will normally take the longest radius available to it to go around a corner, not the MBR! Also - always remember to include the non-flexible end fitting lengths.
(b) In dynamic applications, remember to always calculate the lengths for the most extended configuration during the flexing cycle, not the least extended.
(c) If the configuration is simply too complex for calculation, then obtain a length of flexible tubing of some kind, mark on paper, or a wall, or floor, or both where the connection points will be relative to each other, scaled down if necessary, then manually run the flexible tubing between them with full radii round bends. Measure the extended length, then scale up if necessary to determine the approximate length of the hose.

If in doubt, consult Aflex Hose.

Note: The bend radius is measured to the inside edge of the hose, For the minimum bend radius please refer to page 8.
Conditions of Sale

1. Definitions

“Business Days” means a day (other than a Saturday, Sunday or public holiday) when banks in London are open for business.

“Buyer” means a customer of the Seller.

“Conditions” means these terms and conditions for the sale of goods or the supply of services or both.

“Contract” means a binding contract for the sale of goods or the supply of services or both made by the Seller and the Buyer.

“Emergency Call-out” means the call-out service for emergency breakdowns of the Buyer’s plant or equipment provided by the Seller to the Buyer in accordance with these Conditions in connection with a Contract for the performance of the Services.

“Factored Products” shall mean products which are supplied by Seller, but are not manufactured by Seller, and are purchased by Seller from another supplier or manufacturer.

“Force Majeure Event” means an event beyond the reasonable control of the Seller including but not limited to strikes, lock-outs or other industrial disputes (whether involving the workforce of the Seller or any other party), failure of a utility service or transportation, epidemic or pandemic, war, riot, terrorism, civil commotion, malicious damage, compliance with any law or governmental order, rule, regulation or direction, accident, breakdown of plant or machinery, fire, flood, storm, default of suppliers or subcontractors.

“Goods” means the goods agreed to be sold by the Seller to the Buyer as detailed in the Order Acknowledgment.

“Intellectual Property Rights” means all copyright, database rights, semi-conductor topography rights, design rights, trademarks, trade names, patents, domain names and any other intellectual property rights of a similar nature (whether or not registered) subsisting anywhere in the world.

“Losses” means:

(a) any indirect, special or consequential loss or damage; or
(b) loss of data or other equipment or property; or
(c) economic loss or damage; or
(d) incurring of liability for loss or damage of any nature whatsoever suffered by third parties (including in each case incidental and punitive damages); or
(e) any loss of actual or anticipated profit, interest, revenue, anticipated savings or business or damage to goodwill.

“Seller” means Aflex Hose Limited.

“Services” means the services agreed to be supplied by the Seller to the Buyer as detailed in the Order Acknowledgment.

“Specification for Goods” means the specification for the Goods that is agreed in writing by the Seller and the Buyer.

“Specification for Services” means the specification for the Services that is agreed in writing by the Seller and the Buyer.

2. Interpretation of Contracts

(a) The Uniform Law on International Sales, the United Nations Convention on Contracts for the International Sale of Goods and the international rules for the interpretation of trade terms prepared by the International Chamber of Commerce (INCOTERSMS) shall be excluded. The construction, validity and performance of all Contracts shall be governed by English law and, without prejudice to the right of the Seller to take action against the Buyer in any other court of competent jurisdiction, any claim or dispute arising from or related to or by reason of the Contracts shall be subject to the exclusive jurisdiction of and be determined by the courts of England. The taking of proceedings in any one or more jurisdiction shall not preclude the Seller from taking proceedings in any other jurisdiction, whether concurrently or not, to the extent permitted by the law of such other jurisdiction.

(b) The complete or partial invalidity or unenforceability of any provision in a Contract shall in no way affect the validity or enforceability of the remaining provisions in a Contract. Any such provision shall be deemed to be modified to the minimum extent necessary to make it valid or enforceable. If such modification is not possible, the relevant provision shall be deemed severed subject to such consequential modification as may be necessary for the purpose of such severance.

(c) The headings used herein are for convenience only and shall not affect construction.

(d) Words in the singular include the plural and in the plural include the singular.

(e) Reference to a Condition is to a Condition of these Conditions unless the context requires otherwise.

3. Formation of Contracts and Application of Terms and Conditions

(a) All Contracts shall be deemed to incorporate these Conditions.

(b) Any variation to these Conditions shall have no effect unless expressly agreed in writing and signed by an authorised signatory of the Seller and any variation of a Contract shall have no effect unless it is in writing and signed by the Seller and the Buyer (or their authorised representatives).

(c) A prospective Buyer shall place its order for goods or services (or both) by completing the Seller’s purchase order standard form, if applicable, or by submitting its own purchase order form (in either case, such form is the “Purchase Order”). Each Purchase Order shall be deemed to be an offer by the prospective Buyer to buy the goods or services (or both) of the Seller that are identified in the Purchase Order subject to these Conditions.

(d) The Purchase Order shall only be deemed to be accepted when the Seller issues to the prospective Buyer an order acknowledgement form which indicates acceptance of the prospective Buyer’s offer on these Conditions (the “Order Acknowledgment”). A Contract between the Seller and the Buyer shall come into existence at the time and on the date when the Seller delivers the relevant goods or services (or both) to the Buyer.

(e) The Contract shall constitute the entire agreement between the Seller and the Buyer and the Buyer acknowledges that it has not relied on any statement, promise or representation made or given by or on behalf of the Seller that is not set out in the Contract.

(f) The Buyer shall ensure that the description of the goods or services (or both) ordered which is contained in its Purchase Order and any applicable specifications is complete and accurate.

(g) These Conditions apply to the Contract to the exclusion of all other terms and conditions that the Buyer shall seek to impose or incorporate, or which are implied by trade, custom, practice or course of dealing. These Conditions may be extended by additional terms and conditions issued by the Seller in writing and confirmed in the Order Acknowledgment.

4. Quotations and Purchase Orders

(a) Any quotation issued by the Seller shall not constitute an offer and is given on the basis that no Contract shall come into existence unless and until the Seller despatches a new quotation to the prospective Buyer.

(b) Any quotation issued by the Seller is valid for a period of 5 Business Days for delivery dates and 30 Business Days for orders only after the date of its issue, provided that the Seller has not previously withdrawn it by notice in writing to the Buyer.

(c) Subject to Condition 4(d), any Purchase Order accepted by the Seller shall be accepted on the basis that the price for the goods or services (or both) shall be that set out in the Seller’s quotation on condition that the Seller’s quotation is within its period of validity and notice of withdrawal in writing has not been issued by the Seller at the time of acceptance.

(d) The Seller reserves the right to give in writing notice of the withdrawal of a quotation at any time within the period of validity of the quotation and before the Contract is formed. In the event that the Seller changes the price of any of the goods or services (or both) offered for sale or supply, any existing quotation in respect of those goods or services (or both) shall be deemed to be automatically withdrawn and the Seller shall issue a new quotation to the prospective Buyer.

(e) The prices stated in the Seller’s quotations are exclusive of VAT.

(f) All Purchase Orders placed by a prospective Buyer shall be placed by fax, post or e-mail, or, where agreed in advance in writing by the Seller, by telephone or Seller’s electronic system for prospective Buyers to place orders and make payments.

SALE OF GOODS

5. The Goods

(a) The Goods are described in the Specification for Goods. The Goods shall comply with the Specification for Goods in material respects. Any stated dimension or weight set out in the Specification for Goods is an estimate only.

(b) All performance figures, descriptions (other than any description set out in the Specification for Goods), drawings and samples of Goods are approximate only being intended to serve merely as a guide. The Seller shall not be liable for their accuracy and they shall not form part of the Contract. No Contract shall be a contract by

42
Conditions of Sale continued

(i) any factor beyond the control of the Seller (including foreign exchange fluctuations, increases in taxes and duties, and increases in the cost of acquiring or manufacturing the Goods;

(ii) any request by a Buyer to change the delivery date(s), quantities or types of Goods ordered in the Specification for Goods;

(iii) any delay caused by any instructions of the Buyer in respect of the Goods or failure by the Buyer to give the Seller adequate or accurate information or instructions in respect of the Goods.

(e) All drawings, designs, and quotations for which the Goods are not subsequently ordered by the Buyer shall remain the property of the Seller and be treated as confidential by the Buyer and not used in any way. The Seller shall have no liability in relation to any such drawings, designs or quotation.

(h) The Buyer accepts that Seller is not an expert in the technical features which apply to Factored Products and/or their use in application. Seller’s only obligation will be to pass on to the Buyer all the written information which Seller has itself received regarding the Factored Product, but the Buyer shall be responsible for ensuring that this and any other necessary Factored Product information is obtained and is reviewed and will decide solely if such data is sufficient to ensure that the Factored Product is fit for purpose in the intended usage application. If any application which has not been covered by the information which the Buyer can obtain, then the Buyer undertakes not to use or supply the Factored Product for use in that application. The Buyer is also responsible for ensuring that the Factored Product will not be subjected to levels of usual or accidental physical abuse in service which would cause the Factored Product to fail. The Buyer agrees and acknowledges that Seller, its officers, directors, employees and representatives shall not be held liable for any claims or obligations arising out of the Buyer’s failure to fully or all of its responsibilities set forth in this clause (h), and hereby agrees to indemnify and hold Seller, its officers, directors, employees and representatives fully harmless from any and all claims that may arise in regard to Factored Products. If the Buyer has any doubts concerning these or any other usage conditions and limitation or safety parameters, the Buyer shall consult Seller and request a written response to any queries.

5A. UNTESTED HOSE SUPPLIES FOR SELF-ASSEMBLY BY BUYERS (“SAC”)

If Seller agrees under a Purchase Order to deliver non-standard end fittings to hose assemblies which the Buyer supplies to Seller, Buyer acknowledges and agrees that, in some instances, it is not possible to connect such non-standard fittings to the Seller’s hose testing system in such cases Buyer agrees that Seller shall be entitled, on giving notice to Buyer, not to test such Goods. Seller shall label the hose assembly with a warning that it requires pressure testing before use. The Buyer agrees and acknowledges that Seller shall have no liability whatsoever if the Buyer does not comply with the warning that requires pressure testing before use, and agrees to fully indemnify and hold Seller fully harmless from any and all claims arising from any use by Buyer or onward sale by Buyer of such untested hose assemblies.

6. Despatch and Delivery

(a) For the purposes of this Condition 6, the “Goods” shall mean the Goods in their entirety where delivery is not by instalments or, where delivery is by instalments, each instalment of the Goods.

(b) Unless otherwise agreed in writing by the Seller, delivery of the Goods shall take place at the location stated by the Seller in the Order Acknowledgement (the “Point of Delivery”).

(c) Any stated delivery date is an estimate and time for delivery shall not be of the essence. The Seller will use reasonable endeavours to meet any stated delivery date. If no date for delivery is specified, delivery shall be within a reasonable time.

(d) The Seller shall not be liable for any losses (as defined), caused directly or indirectly by any delay in the delivery of the Goods even if caused by the Seller’s negligence.

(e) Any delay in the delivery of the Goods shall not entitle the Buyer to terminate or rescind the contract unless such delay exceeds one hundred and eighty (180) days.

(g) Except as far as the Contract expressly provides otherwise, standard carriage and packaging is excluded in the price. Seller may select the method of delivery, and charge the Buyer for the cost of carriage. Where the Goods are to be delivered at the Buyer’s request by any special or express means, the Seller will charge the Buyer the full cost of carriage. When any special packaging is required (whether at the Buyer’s request or because the Seller considers special packaging to be necessary), then the Seller will charge the Buyer the full cost of such packaging.

(h) In contracting for carriage and/or insurance of the Goods in transit, if required by the Contract, the Seller shall be deemed to act solely as agent of the Buyer.

(i) The Buyer must:

(i) examine the Goods on delivery;

(ii) notify the Seller and any carrier in writing of any shortage or damage within four (4) Business Days after the date of delivery and in respect of non-delivery within ten (10) Business Days after the Goods would in the ordinary course of events have been received by the Buyer;

(iii) in the case of short or damaged delivery give the Seller a reasonable opportunity to inspect the Goods, otherwise Goods shall be deemed accepted by the Buyer.

(j) Any liability of the Seller for non-delivery of the Goods shall be limited to either delivering the Goods within a reasonable time or issuing a credit note at the pro rata contract rate against any invoice raised for such Goods.

(k) The Seller may deliver the Goods by instalments, each instalment to be deemed to be a separate Contract. Without limiting the other provisions herein, no failure or defect in delivery in respect of any Contract or instalment shall entitle the Buyer to repudiate or cancel any other Contract or instalment.

(l) If for any reason the Buyer fails to accept delivery of any of the Goods within two (2) Business Days of the Seller giving notice to the Buyer that the Goods are ready, or the Seller is unable to deliver the Goods on time because the Buyer has not provided appropriate instructions, documents, licences or authorizations for the Goods when they are tendered by the Seller for delivery then, except where such failure is caused by a Force Majeure Event:

(i) delivery of the Goods shall be deemed to have been completed at 9.00 am on the second (2nd) Business Day after the day on which the Seller notified the Buyer that the Goods were ready;

(ii) risk in the Goods shall pass to the Buyer on completion of delivery; and

(iii) the Seller may store the Goods until delivery takes place, whereupon the Buyer shall be liable for all related costs and expenses (including, without limitation, storage and insurance). The Buyer shall be responsible for paying all losses incurred by the Seller where the Buyer fails to accept delivery of Goods.

(m) If ten (10) Business Days after the Seller giving notice to the Buyer that the Goods were ready the Buyer has not accepted delivery of the Goods, the Seller may resell or otherwise dispose of part or all of the Goods.

(n) Due to the nature of the production of PTFE hose, Seller reserves the right to call a Purchase Order for bulk hose complete in the following situations: (a) if a product is a standard Seller product (as listed in Seller’s product brochures) a figure of +10% of original order quantity can be supplied. If the product is a non-standard product and outside the Seller’s standard product range the figure of +/- 10% of the original order quantity can be supplied. Goods supplied within these parameters would result in the Purchase Order being complete and delivery satisfied.

7. Title

(a) The title in the Goods supplied shall not pass to the Buyer until receipt by the Seller in cleared funds of payment in full (including payment of any default interest) for:

(i) the Goods; and

(ii) any other goods or services that the Seller has supplied to the Buyer and in respect of which payment is due.

(b) Until the title in the Goods passes to the Buyer the Seller shall:

(i) be a bailee of the Goods;
Conditions of Sale continued

(ii) store the Goods separately from all other goods held by the Buyer so that the Goods remain readily identifiable as the Seller’s property;
(iii) not remove, deface or obscure any identifying mark or packaging on or relating to the Goods;
(iv) not fix or annex the Goods to or merge the Goods with any part of the Buyer’s premises, plant or equipment without the Seller’s prior consent in writing;
(v) maintain the Goods in satisfactory condition;
(vi) keep the Goods insured against all risks, for their full price, and ensure that the Seller’s interest in the Goods is noted on the insurance policy until title in the Goods passes to the Buyer. If the Buyer fails to insure the Goods the Seller may do so instead on behalf of the Buyer, who shall reimburse the Seller on demand. Until title in the Goods passes to the Buyer, the Buyer shall hold in trust for the Seller the policy and proceeds of insurance;
(vii) notify the Seller immediately if it becomes subject to any of the events listed in Conditions 21(a)(iv) to 21(a)(x); or gives notice to the Buyer accordingly, then, providing that the Goods have not been resold, or irrevocably incorporated into another product, and without limiting any other right or remedy the Seller may have, the Seller may at any time require the Buyer to deliver up the Goods and, if the Buyer fails to do so promptly, the Seller may enter any premises of the Buyer or of any third party where the Goods are stored in order to recover them.

8. Warranty for Goods
(a) Subject to Condition 8(b), the Seller warrants that on delivery, and for a period of 24 months (12 months for all Hose Assemblies which are “ETH” (“Electrical Trace Heated”)) Grade or are Factoried Products) from the date of delivery the Goods shall:
(i) conform with the Specification for Goods; and
(ii) be free from material defects in material or workmanship.
(b) In respect of Goods which are packages or electrically or electronically controlled or actuated Goods, the Seller warrants that on delivery, and for a period of 12 months from the date of delivery such Goods shall:
(i) conform with the Specification for Goods; and
(ii) be free from material defects in material or workmanship.
(c) Subject to the remainder of this Condition 8, the Seller warrants that if (i) the Buyer provides the Seller with written notification within forty-eight (48) hours of discovering a suspected defect, (ii) if requested by the Seller (after Buyer has provided all relevant information requested by Seller in respect of the suspected defective Goods), the Buyer returns the Goods within the relevant warranty period for such Goods (as set out in either Condition 8(a) or 8(b)); and (iii) on the Seller’s examination such Goods prove defective as to material or workmanship or as to compliance with the relevant Specification for Goods the Seller shall:
(i) give notice to the Buyer that such Goods prove defective as to material or workmanship or as to compliance with the relevant Specification for Goods; and
(ii) following giving notice thereof to the Buyer:
(aa) with respect to Goods which have been manufactured by the Seller, make good the defect without charge by (at the Seller’s option) repairing the defective Goods, replacing defective components of the defective Goods, or replacing the defective Goods (in their entirety) as the Seller in its discretion considers appropriate; or
(bb) with respect to Goods which have been supplied, but not manufactured by the Seller, and to the extent that it is entitled to do so, assign or at its discretion use its reasonable endeavours otherwise to make available to the Buyer, at the Buyer’s expense and on the basis of an indemnity (secured if appropriate) against all Losses that may be incurred by the Seller in relation thereto, the benefit of any obligations and warranties which relate to such defect to which the Seller may be owed by the manufacturer and/or supplier of the Goods or any part or component thereof.
(d) The above warranties shall apply except where the defect in the Goods:
(i) has been caused wholly or partly by deterioration of the Goods which is necessarily incidental to the transit of the Goods;
(ii) has been caused while the Goods were at the Buyer’s risk by:
(aa) wilful default or negligence by the Buyer or its employees, agents, consultants or subcontractors;
(bb) the occurrence of an accident;
(cc) failure by the Buyer to follow the Seller’s instructions in relation to the storage, use, installation, commissioning or maintenance of the Goods;
will provide such statements, certificates and assurances regarding transfer, use, disposition, end-use, source of supply, nationalities and re-export of the Goods as may be required in connection with each party’s application for any required license or governmental authorisation.

(e) Any government fees or charges in connection with obtaining such licenses or authorisations will be the responsibility of the party which is exporting, in the case of exports, and the party which is importing, in the case of imports, the Goods.

(f) The Buyer undertakes not to:

(i) offer the Goods for resale in any country where the Buyer knows the export of the Goods is prohibited by the US Government, the UK Government, the UN, the EU or any other relevant organisation.

(ii) offer to sell the Goods to any person the Buyer knows or suspects will subsequently resell the Goods into a country where export of the Goods is prohibited by the US Government, the UK Government, the UN, the EU or any other relevant organisation.

(g) The Buyer will indemnify the Seller for all losses, costs, damages, claims and expenses awarded against or incurred by the Seller arising out of in connection with any breach of the Buyer’s obligations contained in Condition 11(g).

(h) The Buyer agrees to provide the Seller with any information the Seller reasonably requires concerning the destination and use of the Goods, to allow the Seller to comply in full with any relevant export legislation.

**SUPPLY OF SERVICES**

12. Period of Supply

(a) Unless otherwise specified in the Order Acknowledgment, the agreement for the supply of the Goods shall be for a period of one (1) year from the date the Seller issues an Order Acknowledgment to the Buyer in accordance with Condition 3 (d) (the “Term for Services”).

(b) The Seller reserves the right to increase its price for the Services at any time during the Term for Services. The Seller will give the Buyer notice in writing of any such increase not less than eight (8) weeks before the proposed date of the increase.

If such increase is not acceptable to the Buyer, it shall notify the Seller in writing within two (2) weeks of the Seller’s notice and the Seller shall have the right, without limiting its other rights or remedies, to terminate the Contract by giving four (4) weeks’ notice in writing to the Buyer.

13. Performance of Services

(a) The Seller agrees to provide the Services in accordance with the Specification for Services in all material respects, and to supply as necessary spare or replacement parts and/or consumables, to the Buyer’s plant and/or equipment at the site(s) specified in the Seller’s Order Acknowledgment.

(b) If the Seller agrees to supply spare or replacement parts and/or consumables, such supply will be strictly on the basis of these Conditions.

(c) Any stated performance date is an estimate only and time for performance of the Services shall not be of the essence. The Seller shall use reasonable endeavours to meet any stated performance date.

(d) The Seller shall not be liable for any losses (as defined), caused directly or indirectly by any delay in the performance of the Services even if caused by the Seller’s negligence.

(e) Subject to Condition 13(G), any delay in the performance of the Services shall not entitle the Buyer to terminate or rescind the Contract unless such delay exceeds one hundred and eighty (180) days.

(f) Subject to Condition 13(G), the Seller’s liability for non-performance of Services shall be limited to either performing the Services within a reasonable time or issuing a credit note at the pro rata contract rate against any invoice submitted to the Buyer for the Services.

(g) If the Seller’s performance of the Services is prevented or delayed by the Buyer or the failure of the Buyer to perform any of its obligations under the Contract (“Buyer Default”) then upon the Seller giving the Buyer notice in writing that there has been a Buyer Default:

(i) the Seller shall not be liable for any losses incurred by the Buyer arising directly or indirectly from the Seller’s failure or delay in performing the Services;

(ii) the Seller shall not be liable for any losses incurred by the Buyer arising directly or indirectly from the failure of the Buyer to perform any of its obligations under the Contract (“Buyer Default”) then upon the Seller giving the Buyer notice in writing that there has been a Buyer Default:

(i) the Seller shall without limiting its other rights or remedies have the right to suspend performance of the Services until the Buyer remedies the Buyer Default and to rely on the Buyer Default to relieve it from the performance of any of its obligations to the extent that the Buyer Default prevents or delays the Seller’s performance of the Services;

(ii) the Seller shall not be liable for any losses incurred by the Buyer arising directly or indirectly from the Seller’s failure or delay in performing the Services; and

(iii) the Buyer shall reimburse the Seller on demand for all losses incurred by the Seller arising directly or indirectly from the Buyer Default.

(h) The Seller reserves the right, at the Seller’s discretion, to employ subcontractors to perform all or any part of the Services (including, without limitation, to commission, install, maintain or repair any parts or equipment) on behalf of the Seller.

(i) The Seller warrants that in providing the Services it will exercise reasonable care and attention and that it will comply with all applicable laws and regulations. However the Seller excludes liability for all Losses arising directly or indirectly out of any failure or diminution in performance of the Buyer’s plant or equipment caused by the plant or equipment, or any part thereof:

(i) being used or operated otherwise than in accordance with any applicable installation, maintenance or operational instructions; or

(ii) being used or operated otherwise than in accordance with the Seller’s instructions or recommendations; or

(iii) having been adjusted, changed or altered in any way by the Buyer or any third party since the date of installation or commissioning of the plant or equipment or the date of the immediately preceding visit by the Seller’s employee or sub-contractor.

(j) The Buyer warrants to the Seller that the Buyer’s plant and equipment is supplied with water at a quality that complies with BS2486 and is compliant with any additional requirements in writing notified by the Seller to the Buyer in respect of the Buyer’s plant and equipment. The Seller excludes all liability for Losses arising directly or indirectly out of any failure or diminution in performance of the Buyer’s plant or equipment or any part thereof which is caused directly or indirectly by a breach by the Buyer of this warranty.

(k) The Seller reserves the right to replace at the Buyer’s cost the Buyer’s plant or equipment or any part thereof which is unserviceable or inefficient as the Seller considers reasonably necessary in order to fulfill its obligations to provide the Services in accordance with the specification set out in the Order Acknowledgment.

(l) Alternatively, the Seller may charge the Buyer for the reconditioning of any part of the Buyer’s plant or equipment that, in the reasonable opinion of the Seller, cannot be suitably or economically repaired on site. The Seller will provide the Buyer with an estimate of reconditioning charges for each item and if the Buyer does not agree to have the item(s) reconditioned, the Seller reserves the right to amend the scope of the Services as in its absolute discretion it considers necessary.

14. Access to Buyer’s Site(s)

(a) The Buyer shall co-operate with the Seller in all matters relating to the Services, and shall provide the Seller with such information as the Seller may reasonably require in order to perform the Services. The Buyer shall ensure that such information is accurate in all material respects.

(b) The Buyer shall obtain and maintain any necessary licences, permissions, and consents which may be required before the date upon which the Services are due to start.

(c) The Buyer shall permit the Seller, its employees, agents, consultants and subcontractors full and free access to the Buyer’s site(s) and to the Buyer’s plant and equipment which is the subject of the Contract, subject to the Seller and its employees, agents, consultants and subcontractors complying with the Buyer’s reasonable requirements as to site safety and security. If, at the time of any pre-arranged visit the Seller’s employees, agents, consultants and subcontractors are unable to gain access to the Buyer’s site(s) or plant or equipment in order to supply the Services, the Seller reserves the right to charge for the time spent attending at the Buyer’s site(s) and for the cost of carrying out any subsequent visit.

(d) If reasonably required by the Seller, the Buyer shall make available to the Seller a secure storage area at the Buyer’s site(s) for storage of the Seller’s service equipment and shall keep all materials, equipment, documents and other property of the Seller (the “Seller Service Equipment”) in such storage area in safe custody and at the Buyer’s risk. The Buyer shall not dispose of the Seller Service Equipment other than in accordance with the Seller’s instructions in writing.

(e) Prior to any visits by the Seller’s employees, agents, consultants or subcontractors, the Buyer will:

(i) strip back any pipe lagging;

(ii) supply and erect suitable scaffolding (if required) to allow working access to the Buyer’s plant and equipment; and

(iii) supply any necessary lifting equipment and required operators.

(f) Following any visits by the Seller’s employees, agents, consultants or subcontractors, the Buyer will be responsible for the reinstatement of any pipe lagging and the dismantling of any scaffolding erected.

(g) The Buyer will provide the Seller’s employees, agents, consultants and subcontractors with all specialist safety clothing or equipment as may be necessary to meet the Buyer’s health and safety and environmental rules (excluding hard hat, safety glasses, overalls and protective shoes which will be provided by the Seller).

(h) The Buyer will procure that the Seller’s employees, agents, subcontractors are covered by the Buyer’s third party liability insurance policy of an amount of not less than three million pounds (£3,000,000) per occurrence whilst such employees or subcontractors are on the Buyer’s site(s).
(i) Emergency Call-outs are intended for genuine emergency breakdown of the Buyer’s plant or equipment which is the subject of the Contract only and will be charged by the Seller to the Buyer at the appropriate daily rate specified in the Order Acknowledgment for the supply of the Services.

(j) The Buyer acknowledges and agrees that the Seller shall at no time own, occupy or control (or be deemed to control) any part of the Buyer’s site(s) and/or hold or be fixed with any duties or liabilities under health or safety laws or regulations or common law in relation to any part of the Buyer’s site(s).

GENERAL

15. Payment and Other Buyer Obligations

(a) In respect of the Goods, subject to Condition 15(d) the Seller shall invoice the Buyer for the full purchase price of the Goods on or at any time after the despatch of the Goods.

(b) In respect of the Services, the Seller shall invoice the Buyer for the Services either monthly or quarterly as set out in the Contract.

(c) In the event that the Buyer chooses to purchase additional Goods or Services from the Seller that are not set out in the Contract but which are related to the Contract, the terms of such Contract will be deemed to apply to such additional Goods or Services and the Seller will invoice the Buyer for such Goods and Services pursuant to Condition 15(a) or 15(b), as appropriate, under the original Purchase Order number unless otherwise agreed between the parties.

(d) The Seller may in its absolute discretion agree in writing to the Buyer paying for the Goods in instalments, or may agree in writing to extend credit to the Buyer in respect of the payment for Goods. In the event that the Seller agrees to pay by instalments for any instalment in respect of the payment by the Buyer for Goods, the Seller shall invoice the Buyer monthly for agreed instalments of the purchase price. The Seller may in its absolute discretion by notice in writing to the Buyer withdraw (with immediate effect) the Buyer’s right to credit or to pay for the Goods by instalments.

(e) The Buyer shall pay each invoice submitted by the Seller:

(i) within the earlier of thirty (30) days of the date of the invoice or such other period of time after the date of the invoice as has been agreed in the Contract; and

(ii) in Sterling or such other currency as the Seller may from time to time agree in writing) to a bank account nominated in writing by the Seller.

(f) Time is of the essence in relation to payment.

(g) All amounts payable by the Buyer under the Contract are exclusive of VAT chargeable from time to time. Where any taxable supply for VAT purposes is made under instalments or extended in respect of the payment by the Buyer for Goods, the Seller shall invoice the Buyer for the full purchase price of the Goods on or at any time after the despatch of the Goods.

(h) The Buyer shall make all payments due under the Contract in full without any deduction whatsoever by way of set-off, counterclaim, discount, abatement or otherwise unless required by law.

(i) No payment shall be deemed to have been received until the Seller has received cleared funds.

(j) All payments payable to the Seller under the Contract shall become due immediately on its termination despite any other provision.

(k) If the Buyer fails to pay the Seller any sum due pursuant to the Contract by the due date for payment:

(i) the Buyer shall be liable to pay interest to the Seller at the maximum rate allowed by applicable law; and

(ii) the Seller may, in its absolute discretion and without liability to the Buyer, suspend performance of its obligations under the Contract and under any or all other Contracts between the Seller and the Buyer or terminate the Contract and any or all other Contracts between the Seller and the Buyer with immediate effect.

(l) if the Buyer pays any amount to the Seller without apportioning it between specific debts or liabilities, the amount paid shall be apportioned as the Seller thinks fit. The Seller may attribute the entirety of an amount paid to one or more specific items in respect of which payment is due, rather than to all the items in respect of which payment is due.

(m) Buyer shall comply with all applicable laws, statutes, regulations and codes from time to time in force, including those relating to data protection and to anti-bribery and corruption. Buyer must comply with the requirements of the United Kingdom Bribery Act 2010 (the “Act”) and shall not engage in any activity, practice or conduct which would constitute an offence under sections 1, 2, or 6 of the Act if such activity, practice or conduct had been carried out in the United Kingdom. Additionally, Buyer shall comply, and shall ensure compliance of any party with which it subcontracts, with the requirements of the United Kingdom Modern Slavery Act (2015), including ensuring that all forms of forced labour are eliminated from its business.

16. Cancellation

(a) No contract shall be cancelled by the Buyer except with the Seller’s prior consent in writing.

(b) In the event of the Seller agreeing to the Buyer cancelling all or any part of the Contract, the Seller may, without prejudice to any other rights against the Buyer which it may have, require the Buyer to pay a cancellation charge. Any cancellation charge will correspond to the type of contract being cancelled. Contracts for bespoke Goods manufactured by the Seller to the Buyer’s specifications may be subject to a cancellation charge of 100% of the price of the Contract after the Order Acknowledgement has been received.

(c) In the event that the Seller agrees to cancellation of a Contract in respect of the supply of Goods or Services or both which have been ordered to comply with the Buyer’s special requirements, the Buyer shall be liable for all costs incurred by the Seller up to the time of cancellation of the Contract in addition to payment of a cancellation charge pursuant to Condition 16(b).

17. Intellectual Property

(a) The Buyer acknowledges that:

(i) the Intellectual Property Rights in the Goods and any materials prepared by the Seller or on its behalf which relate to the Goods and their development (including, without limitation, drawings, designs, samples, models and similar items) (the “Goods Materials”) are the Property of the Seller or the third party manufacturers of the Goods (as applicable);

(ii) nothing in these Conditions or in a Contract shall be construed as conferring any licence or granting any rights in favour of the Buyer in the Intellectual Property Rights in the Goods or the Goods Materials. The Buyer may re-sell the Goods subject to the Seller’s right to control the use of its trade marks within the European Economic Area or jurisdiction into which the Goods are sold and the Buyer shall assist the Seller as required to prevent parallel importation of the Goods or to prevent parallel importation of the Goods Materials. The Buyer shall not, without the prior written consent of the Seller, sell, export or otherwise dispose of any such Goods Materials or the Goods or any part thereof in such a manner as to interfere with the Solvay's rights in the Goods Materials or the Goods or any part thereof.

(iii) any goodwill in any trade marks affixed or applied to the Goods shall enure to the sole benefit of the Seller or any other owner of the trade marks from time to time.

(b) The Buyer shall not repack the Goods and shall not without the Seller’s prior consent in writing allow any trade marks of the Seller or other words or marks applied to the Goods to be obliterated, obscured or omitted or add any additional marks or words.

(c) The Buyer shall not use (other than pursuant to these Conditions or a Contract) or seek to register any trade mark or trade name (including any company name) which is identical to, confusingly similar to, or incorporates any trade mark or trade name which the Seller owns or claims rights anywhere in the world.

(d) If at any time it is alleged that the Goods infringe the rights of any third party or if, in the Seller’s reasonable opinion, such an allegation is likely to be made, the Seller may at its option and its own cost:

(i) modify or replace the Goods in order to avoid the infringement; or

(ii) procure for the Buyer the right to continue using the Goods; or

(iii) repurchase the Goods at the price paid by the Buyer, less depreciation at the rate the Seller applies to its own equipment.

(e) The Buyer shall promptly notify the Seller of:

(i) any actual, threatened or suspected infringement of any of the Intellectual Property Rights in the Goods or the Goods Materials (or both) which comes to the Buyer’s notice; and

(ii) any claim by any third party that comes to the Buyer’s notice that the sale or advertisement of the Goods or the use of the Goods Materials (or both) infringes the rights of any person.

(f) The Buyer agrees (at the Seller’s request and expense) to do all such things as may be reasonably required to assist the Seller in taking or resisting any proceedings in relation to any infringement or claim referred to in Condition 17(e), and the Buyer shall not make any admissions or statements in respect of or compromise any such claim other than with the prior written consent of the Seller.

(g) In the event of any claim, proceeding or suit by a third party against the Buyer alleging an infringement of such party’s rights by any of the Intellectual Property Rights in the Goods or the Goods Materials (or both), the Seller shall defend the claim, proceeding or suit at the Seller’s expense, subject to:

(i) the Buyer promptly notifying the Seller in writing of any such claim, proceeding or suit; and

(ii) the Buyer being given sole control of the defence of the claim, proceeding or suit, and provided that the Seller shall not be liable and shall not defend the claim, proceeding or suit to the extent that such infringements arise out of or in connection with modifications to the Goods or the Goods Materials (or both) made by anyone other than the Seller or its authorised representative, or out of use or annexation of the Goods or the Goods Materials (or both) with or to products or third party materials not specified or expressly approved in advance in writing by the Seller, or where the claim, proceeding or suit arises from the Buyer’s adherence to the Buyer’s requested changes to the Specification for Goods or from infringing items of the Seller’s origin, design or selection.

(h) The Seller shall reimburse the Buyer with an amount equal to any liability assessed against the Buyer by final judgment on account of an infringement described in Condition 17(g).
Conditions of Sale continued

(i) All Intellectual Property Rights in the or arising out of the or in connection with the Services shall be owned by the Seller.

(j) All Intellectual Property Rights in the materials, equipment, documents and other property of the Seller are the exclusive property of the Seller or of its licensors and shall be returned to the Seller on demand.

18. Trade Prohibitions

(a) The Buyer undertakes to the Seller that the Buyer shall not re-sell or otherwise supply the Goods to a third party which is the subject of any statutory trade prohibition of the United States of America or a member state of the European Union ("Sanctioned Third Party").

(b) Without prejudice to Condition 18(a), if the Seller shall have notice of or reasonable grounds to believe that the Buyer intends to re-sell or otherwise supply the Goods to a Sanctioned Third Party the Seller may upon giving notice thereof to the Buyer refuse to deliver the whole or any part of the Goods and shall have no liability to the Buyer for such refusal.

19. Limitation and Exclusion of Liabilities

(a) SUBJECT TO AND WITHOUT LIMITING CONDITION 19(B) OR ANY OTHER CONDITION, THE SELLER SHALL NOT BE LIABLE TO THE BUYER WHETHER IN CONTRACT, TORT (INCLUDING NEGLIGENCE), BREACH OF STATUTORY DUTY, OR OTHERWISE, FOR ANY LOSSES (AS DEFINED) ARISING DIRECTLY OR INDIRECTLY OUT OF OR IN CONNECTION WITH ANY CONTRACT FOR THE SUPPLY OF GOODS AND/OR SERVICES (OR THAT PART OF A CONTRACT WHICH RELATES TO GOODS AND/OR SERVICES).

(b) Notwithstanding any other terms of these Conditions the Seller does not limit or exclude its liability for fraud or fraudulent misrepresentation or for death or personal injury resulting from its negligence or the negligence of its employees, agents or subcontractors.

(c) SUBJECT TO AND WITHOUT LIMITING CONDITION 19(B) OR ANY OTHER CONDITION, THE SELLER'S TOTAL LIABILITY TO THE BUYER IN RESPECT OF ALL OTHER LOSS ARISING OUT OF OR IN CONNECTION WITH ANY CONTRACT FOR THE SUPPLY OF GOODS AND/OR SERVICES (OR THAT PART OF A CONTRACT WHICH RELATES TO GOODS AND/OR SERVICES), WHETHER IN CONTRACT, TORT (INCLUDING NEGLIGENCE), BREACH OF STATUTORY DUTY, OR OTHERWISE, SHALL IN NO CIRCUMSTANCES EXCEED THE VALUE OF THE CONTRACT WHICH GAVE RISE TO BUYER'S CLAIM.

(d) THE BUYER ACKNOWLEDGES AND AGREES THAT THE LIMITED WARRANTIES AND ALL LIMITATIONS AND EXCLUSIONS OF THE SELLER'S LIABILITY SET OUT IN THESE CONDITIONS ARE REASONABLE AND ARE REFLECTED IN THE PRICE OF THE GOODS OR SERVICES (OR BOTH) (AS APPLICABLE) AND THE BUYER SHALL ACCEPT RISK OR INSURE ACCORDINGLY (OR BOTH).

The Seller shall have no responsibility for any Losses incurred by the Buyer in the event that any information in any quotation or Order Acknowledgement is applied in connection with products other than the Goods and Services.

(f) This Condition 19 shall survive the termination or cancellation of the Contract.

20. Force Majeure

(a) The Seller shall not be liable to the Buyer as a result of any delay or failure to perform its obligations under the Contract as a result of a Force Majeure Event.

(b) If the Force Majeure Event prevents the Seller from providing any of the Services or Goods (or both) for more than forty-four (44) Business Days, the Seller shall, without limiting its other rights or remedies, have the right to terminate the Contract with the Buyer immediately by giving notice in writing to the Buyer.

21. Events of Default, Termination, Repossession, Suspension; Dispute Resolution

(a) The Seller may terminate the Contract with immediate effect by giving notice in writing to the Buyer if:

(i) the Buyer fails to pay any amounts due under the Contract on the due date for payment; or

(ii) the Buyer otherwise breaches the Contract with the Seller and the breach, if remediable and previously notified in writing to the Buyer, is not remedied within five (5) Business Days of the Buyer receiving such notice; or

(iii) the Seller terminates any other Contract between the Seller and the Buyer; or

(iv) the Buyer is otherwise becomes insolvent or unable to pay its debts or suspends payment of its debts or threatens to do so or is unable to pay its debts as they fall due or admits its inability to pay its debts; or

(v) the Buyer commences negotiations with all or any class of its creditors with a view to rescheduling any of its debts, or makes a proposal for or enters into any compromise or arrangement with its creditors other than for the sole purpose of a scheme for a solvent amalgamation;

(vi) a petition is filed, a notice is given, a resolution is passed, or an order is made, for or in connection with the winding up of the Buyer other than for the sole purpose of a scheme for a solvent amalgamation;

(vii) a creditor or encumbrancer of the Buyer attaches or takes possession of, or a distress, execution, sequestration or other such process is levied or enforced on or sued against, the whole or any part of its assets and such attachment or process is not discharged within fourteen (14) days;

(viii) an application is made to court, or an order is made, for the appointment of an administrator or if a notice of intention to appoint an administrator is given or if an administrator is appointed over the Buyer;

(ix) the holder of a qualifying charge over the assets of the Buyer has become entitled to appoint or has appointed an administrative receiver;

(x) a person becomes entitled to appoint a receiver over the assets of the Buyer or a receiver is appointed over the assets of the Buyer;

(xi) any event occurs, or proceeding is taken, with respect to the Buyer in any jurisdiction to which it is subject that has an effect equivalent or similar to any of the events mentioned in Conditions 21(a)(iv) to Condition 21(a)(x) (inclusive);

(xii) the Buyer suspends, threatens to suspend, ceases or threatens to cease to carry on, all or substantially the whole of its business;

(xiii) the Buyer's financial position deteriorates to such an extent that in the Seller's opinion the Buyer's capability to adequately fulfill its obligations under the Contract has been placed in jeopardy.

(b) In the event that the Seller terminates the Contract pursuant to Condition 21(a)(i) the Seller may (in its absolute discretion and without prejudice to its other rights under these Conditions or otherwise) by notice in writing to the Buyer do any one or (to the extent not inconsistent with one another) more of the following:

(i) suspend any deliveries of Goods to be made under any contract with the Buyer;

(ii) revoke any express or implied authority to sell or use any Goods the title in which has not passed to the Buyer ("Relevant Goods");

(iii) require the Buyer to deliver to the Seller any Relevant Goods; and the Buyer shall do so, failing which the Seller may enter the premises where the Relevant Goods are and/or possess the Goods, without liability for any resulting damage to the Buyer's premises, plant or equipment.

(c) All disputes arising out of or in connection with the Contract shall be submitted to the International Court of Arbitration of the International Chamber of Commerce and shall be finally settled under the Rules of Arbitration of the International Chamber of Commerce by one or more arbitrators appointed in accordance with the said Rules. The place of arbitration shall be London with the laws of England governing the Contract. The language of the arbitration shall be English.

22. Confidentiality

Each of the Seller and the Buyer (the “Receiving Party”) shall keep in strict confidence all technical or commercial know-how, specifications, inventions, processes or initiatives which are of a confidential nature and have been disclosed to the Receiving Party by the other party ("Disclosing Party"), its employees, agents or subcontractors, and any other confidential information concerning the Disclosing Party’s business, its products and services which the Receiving Party may obtain. The Receiving Party shall only disclose such confidential information to those of its employees, agents and subcontractors who need to know it for the purpose of discharging the Receiving Party’s obligations under the Contract, and shall ensure that such employees, agents and subcontractors comply with the obligations set out in this Condition 22 as though they were a party to the Contract. The Receiving Party may also disclose such of the Disclosing Party’s confidential information as is required to be disclosed by law, any governmental or regulatory authority or by a court of competent jurisdiction. This Condition 22 shall survive termination or cancellation of the Contract.

23. Miscellaneous

(a) The Seller’s rights under these Conditions are in addition to any other rights which the Seller may have under the general law or otherwise.

(b) If the Buyer comprises two or more persons, their obligations are joint and several.

(c) The Buyer shall not assign, transfer, mortgage, charge, sub-contract, or otherwise dispose of or deal in any Contract or any rights or obligations (or both) (as applicable) hereunder in whole or in part without the Seller’s prior consent in writing. Any such action purported to be taken by the Buyer without the Seller’s prior consent in writing shall be void.

(d) The Seller may at any time assign, transfer, mortgage, charge, sub-contract, or otherwise dispose of or deal in any Contract or any rights or obligations (or both) (as applicable) under any Contract or any part of it to any person, firm or company.

(e) A waiver by the Seller of any right under the Contract or law will only be effective if it is in writing. Any failure or delay by the Seller in exercising, or any partial exercise by the Seller, of any right or remedy under the Contract or by law shall not constitute as a waiver of that or any other right or remedy. No single exercise by the Seller shall prevent the further exercise of that or any other right or remedy.

(f) Any waiver by the Seller of any breach of, or any default under, any provision of the Contract by the Buyer shall not be deemed a waiver of any subsequent breach or default and shall not in any way affect the other terms of the Contract.

(g) No term of the Contract shall be enforceable by any person that is not a party to it.

(h) This Condition 23 shall survive termination or cancellation of the Contract.
24. Notices

(a) Any notice to be given by the Buyer under these Conditions or any relevant Contract to the Seller shall be in writing and given by prepaid first class post or hand-delivered to Aflex Hose Limited, Bradley Business Park, Huddersfield, West Yorkshire, HD2 1GZ or to such other address or for the attention of such person as the Seller may notify to the Buyer.

(b) Any notice to be given by the Seller under these Conditions or any relevant Contract to the Buyer shall be in writing and given by prepaid first class post or hand-delivered to any address from which the Seller has received communications from the Buyer in connection with these Conditions or the Contract.

(c) Notices shall be deemed to have been received:

(i) if sent by prepaid first class post, two (2) Business Days after posting (exclusive of the day of posting); or

(ii) if delivered by hand, on the day of delivery.
